**QUESTION 1**

Which of the following is true regarding the IBM Cognos BI gateway?

- A. The gateway can be configured to send requests directly to the Content Manager.
- B. For failover, the gateway can be configured to know the location of multiple dispatchers.
- C. When more than one dispatcher is available, the gateway can automatically balance the load of requests by sending them to any dispatcher.
- D. If the gateway is installed on a machine that is separate from where other IBM Cognos BI components are installed, the services for the gateway must be started first.

Correct Answer: B

---

**QUESTION 2**

A user wants to be able to view the contents of a container entry, such as a package or a folder, and view general properties of the container itself without having full access to the content. Which permission does the administrator assign to the user?

- A. Read
- B. Write
- C. Traverse
- D. Set Policy

Correct Answer: C

---

**QUESTION 3**

An administrator creates a shortcut that points to an invoice report. What happens if the invoice report is renamed?

- A. The shortcut contains the original name and can be used to view the latest output before the report was renamed.
- B. The shortcut contains the original name and no longer works because the link to the report is broken.
- C. IBM Cognos Connection automatically updates the report name in the shortcut, and the shortcut remains fully functional.
- D. IBM Cognos Connection automatically deletes the shortcut.

Correct Answer: B

---

## QUESTION 4

The Report Upgrade task in IBM Cognos Connection provides options for upgrading report specifications. Which of the following is one option?

- A. By folder
- B. By role
- C. By group
- D. By user profile

Correct Answer: A

---

## QUESTION 5

When the default active Content Manager fails, which of the following occurs?

- A. The system automatically activates all standby Content Managers, and spreads the load of requests based on the Weighted Round Robin load balancing mode.
- B. The system automatically activates all standby Content Managers and spreads the load of requests across them all.
- C. The system automatically switches to a standby Content Manager, and requests are directed to it.
- D. Users are prompted to rerun failed requests on the initial Content Manager once it is back on line.

Correct Answer: C

There are 2 load balanced report servers.

The dispatcher on Computer X has the following characteristics:

RAM: 1024 MB  
CPU: Dual P4 1.5 Ghz  
Hard drive: 80 GB

The dispatcher on Computer Y has the following characteristics:

RAM: 2048 MB  
CPU: Dual P4 3.8 Ghz  
Hard drive: 80 GB

What would an administrator set the processing capacity on Computer Y to?

- A. 1
- B. 2

C. 4

D. 8
