QUESTION 1

Which view best displays the list of all callers and callers of a selected method?

- A. Call Hierarchy
- B. Hierarchy
- C. Outline
- D. Package Explorer

Correct Answer: A

QUESTION 2

A developer creates Web services from JavaBeans using JAX-RPC runtime. Which two java types in the JavaBean can be used for code generation? (Choose two.)

- A. java.math.BigDecimal
- B. java.util.ArrayList
- C. int[]
- D. org.w3c.dom.Element

Correct Answer: AC

QUESTION 3

What comprises a test unit when testing an application using JUnit?

- A. one JSP page
- B. a single application to be tested
- C. the smallest testable part of an application
- D. a single Java class

Correct Answer: C

QUESTION 4

A team is developing a set of related enterprise applications which run on the same application server and use the same set of third party java library. During testing they discover that the java library is very large, causing the WebSphere Application server to run out of heap space. What is the best solution to this problem?

- A. remove the Jar from each EAR, add the jar file to its own Enterprise Application project, and deploy this application separately to the same application server
- B. optimize the JVM settings within the Administration Console to increase the maximum and minimum amount of heap size and increase the frequency of garbage collection
- C. include the library in the enhanced EAR description of the Enterprise Application projects from Application Developer
- D. remove the Jar from each EAR and add the jar file as a shared library in the Administration Console

Correct Answer: D

QUESTION 5

A developer has made multiple changes to a Java file. How can the developer switch back to an earlier version of the file?

- A. context pop-up menu > Compare with > Local history
- B. context pop-up menu > Edit > Reset
- C. context pop-up menu > Replace With > Local history
- D. File > Replace with Previous

Correct Answer: C
