QUESTION 1

You are scanning a Web site in a pre-production environment. You notice that your scan is running very slowly and there are numerous communication errors. What would you do to resolve the problem?

A. increase the number of threads and decrease the timeout limit

B. decrease the number of threads and increase the timeout limit

C. increase the number of threads and increase the timeout limit

D. set the timeout to 0 for infinite timeout

Correct Answer: B

QUESTION 2

You are scanning a Web application in a pre-production environment. During your initial assessment, you notice that some of the links are specified by IP and some by host name. Your starting URL contains an IP address, http://12.34.56.67/ default.jsp. When the scan completes, you discover that it has not covered a significant portion of your Web application. What could be the reason?

A. The host name is not added to the list of additional domains and servers.

B. The scan is configured to use only one connection.

C. There is no route to IP 12.34.56.67.

D. You are not licensed to scan IP 12.34.56.67.

Correct Answer: A

QUESTION 3
