QUESTION 1

Which statement is true about URL settings in Automatic Form Fill?

- A. If a URL is not provided for a value, this value will not be used.
- B. If a URL is provided for a value, this value will be used only for parameters in this URL.
- C. If a URL is not provided for a value, this value will be used only if match type is Complete.
- D. If a URL is provided for a value, this value will be used only for parameters in this URL and if match type is Complete.

Correct Answer: B

QUESTION 2

A starting URL is `http://test_domain1 .com`. scan only links in and below this directory is enabled. `Test_domain2.com` is included in the additional servers and domains in this scan.

What would happen in this situation?

- A. `Test_domain1 .com` and `test_domain2.com` will be scanned.
- B. Only `test_domain2.com` will be scanned, because Additional Servers and Domains setting takes precedence.
- C. Only `test_domain1 .com` will be scanned, because Scan only links and below this directory takes precedence.
- D. `Test_domain1 .com` will be scanned and `test_domain2.com` will be scanned only if `test_domain1 .com` contain links to `test domain2.com`.

Correct Answer: D

QUESTION 3

Why is it important that error pages are correctly defined?

- A. IBM Security AppScan Standard Edition cannot handle redirection without correctly defined error pages.
- B. IBM Security AppScan Standard Edition cannot maintain session state without correctly defined error pages.
- C. If IBM Security AppScan Standard Edition understands the application's request is an error, it can more properly pass or fail certain tests.
- D. If IBM Security AppScan Standard Edition understands the application's response is an error, it can more properly pass or fail certain tests.

Correct Answer: D

QUESTION 4

The application you are testing contains links to external websites. You want to restrict the scan to the designated web application URL.

Which configuration option should you use?

- A. Enable Scan only links in and below this directory.
- B. Add links to external website to the Exclude Paths list.
- C. AppScan automatically identifies the website during a test.
- D. Edit the hosts file to map the production website to the test website.

Correct Answer: A

QUESTION 5

Where can you configure Multi-Step Operations?

- A. Explore > Manual Explore
- B. Tools > Options > Multi-Step Operations
- C. Job Configuration > Multi-Step Operations
- D. Scan Configuration > Multi Step Operations

Correct Answer: D
