QUESTION 1

The Appliance Dashboard shows a high-level view of current operations and statistics. One of these statistics is the current CPU activity.

Which set of steps is used if the CPU activity of a hardware appliance shows constant use and averages above sixty percent?

A. Review the current trace level, the number of policies, and the use of PIPs. Then, add another CPU to the redundant CPU slot.

B. Review the current trace level, the number policies, and the use of PIPs. Then, increase capacity by adding another hardware appliance.

C. Disable all traces, clear out all logs, and switch partitions to allow the primary partition to be defragmented. Then, update the CPU to the latest current supported architecture.

D. Disable all traces, clear out all logs, and switch partitions to allow the primary partition to be defragmented. Then, purchase and load the Enterprise CPU Feature key to enable the secondary CPU.

Correct Answer: C

QUESTION 2
