#### QUESTION 1

Which factor could positively impact the readiness for and success of SOA?

- A. A high level of understanding of the value of SOA
- B. The use of specialized line of business applications
- C. Informal build and deployment processes for services
- D. The use of in-house developed messaging as part of their Enterprise Service Bus (ESB)

Correct Answer: A

---

#### QUESTION 2

Why is reusability an important aspect to promoting agility in SOA?

- A. Services often represent functions in an SOA.
- B. Existing applications may serve as the basis for service interfaces.
- C. The interface of a service allows it to be integrated into additional processes without changes.
- D. Service interface details may be defined at a high level according to anticipated business requirements.

Correct Answer: C

---

#### QUESTION 3

Which organization has the greatest need for SOA governance?

- A. One that is structured around localized business representatives for the IT team(s).
- B. One in which the departments are small, geographically centralized, and provide many goods and services.
- C. One that is relatively large, geographically dispersed, and with a centralized management and funding structure.
- D. One in which the funding, management and control of IT resources are spread among multiple stakeholders in different parts of the organization.

Correct Answer: D

---

#### QUESTION 4

Which capabilities reside within the Enterprise Service Bus (ESB)?

- A. Service mediation and routing logic

- B. Service logic and message transformation
- C. Service implementations and service access control
- D. Service routing and a registry of service endpoints

Correct Answer: A

---

#### QUESTION 5

A company has prioritized their most important requirements for SOA to be the need to speed up integration, reduce application redundancy and provide the flexibility to change service implementations.

Which type of project should be recommended?

- A. Create a common metadata model that can be used for all development projects.
- B. Implement an Enterprise Service Bus (ESB) and registry/repository as a connectivity layer in the SOA architecture.
- C. Document the existing architecture, legacy systems, and interfaces. Make this available in a common repository that can be accessed by all developers.
- D. Use business modeling tools to model and simulate the application development process and identify bottlenecks. Address highest priority bottlenecks that can be automated to E.

Correct Answer: B
