QUESTION 1

An administrator needs to view Resource Statistics data in WebSphere Message Broker Explorer for a remote broker. After creating a connection to the remote broker, which action does the administrator need to perform next?

- A. Select '\\JMS Queues Setup\\'
- B. Enable Resource Statistics
- C. Enable Message Flow Statistics
- D. Subscribe to Resource Statistics

Correct Answer: A

QUESTION 2

A message flow that includes HTTP nodes is deployed to 3 execution groups in a broker. All HTTP nodes are configured to use a single port. After performance testing, it is decided that the inbound and outbound HTTP messages in each execution group should be routed through separate listener ports in order to achieve higher throughput. An administrator is asked to make the configuration changes. Which one of the following actions is required to achieve this?

- A. Run command mqsichangeproperties to enable the broker-wide listener.
- B. Run command mqsichangeproperties to disable the broker-wide listener.
- C. Run command mqsichangeproperties to disable all of the execution group listeners.
- D. Run command mqsichangeproperties to enable one of the execution group listeners.

Correct Answer: B

QUESTION 3

An administrator has been asked to enable broker administration security in a UNIX environment and restrict deployment activities to users belonging to only a specific group. Which of the following commands does the administrator need to use to achieve this?

- A. mqsichangebroker, setmqaut
- B. mqsichangebroker, mqsicreateaclentry
- C. mqsichangeproperties, setmqaut
- D. mqsichangeproperties, mqsicreateaclentry

Correct Answer: A

QUESTION 4

A BAR file which contains a message flow with SOAP nodes is provided by the development team for deployment. Before deploying the BAR file, the administrator needs to verify whether or not the port number is defined correctly. What should the administrator do to verify what ports have been allocated to the SOAP nodes?

- A. Run command `mqsireadbar`.
- B. Run command `mqsiexportproperties`.
- C. Ask the developer to provide the port number.
- D. Require the developer to provide the message flow source code.

Correct Answer: A

QUESTION 5

An administrator has backed up a broker on AIX using the command `mqsibackupbroker`. After the broker is restored on a new machine, which one of the following tasks must be completed?

- A. Restore JAR files that were deployed in BAR files.
- B. Restore the configurable services that were defined.
- C. Restore the necessary MQ queues for message flows.
- D. Restore the `/var/mqsi/components/` file system.

Correct Answer: C
