QUESTION 1

A BPM application developer needs to create custom SQL queries targeting the Business Performance Data Warehouse to satisfy a customer's reporting requirements. While browsing the system catalog of the database management system, the developer notices tables and views corresponding to the tracking groups defined in the process application.

Which database artifacts should the developer query to obtain only the actively tracked data? The BPM application developer should query the:

- A. views, because the views contains more recent data than the tables.
- B. views, because the views contain only the data resulting from the updated tracking definitions.
- C. tables, because the tables contains more recent data than the views.
- D. tables, because the tables contain only the data resulting from the updated tracking definitions.

Correct Answer: B

QUESTION 2

A document imaging and management company is implementing a business process diagram which requires a rules evaluation for the retention time of incoming documents. A BPM Analyst has requested that these rules be created using a natural language technology within IBM Business Process Manager V8.0.

What decision service component should the BPM application developer use to create these rules?

- A. BAL Rule
- B. Server Script
- C. Decision Table
- D. JRules Decision Service

Correct Answer: A

QUESTION 3

A BPM application developer has completed the development of a process application. The team lead has now directed the application developer to install the snapshot onto a staging server for additional testing before it is moved into production. Assuming the default Process Server settings are in place, what minimum level of access must the developer have in order to install the snapshot onto the staging server? The application developer must have, at a minimum:

- A. write access to the process application with no additional group membership.

B. write access to the process application and must be a member of the process-center-install-group as defined in the 100Custom.xml file.

C. administrative access to the process application with no additional group membership.

D. administrative access to the process application and must be a member of the process-center-install-group as defined in the 100Custom.xml file.

Correct Answer: A

QUESTION 4

A BPM application developer needs to create an integration with an external system that has a WSDL available. The external system requires a user name and password as a digest for the authentication mechanism.

How can the BPM application developer achieve this requirement?

A. 1. Create an Integration Service and drag the "Java integration" from the palette to the canvas.

2.

Under Definition, select "SOAPMessageConnector" class and select the operation "Call WebService with UsernameToken (Password in Digest)"

3.

Enter the User Credentials to be passed to the external system.

B. 1. Create an Undercover Agent.

2.

Under Implementation, discover/browse the WSDL and select the operation.

3.

Under Security, select the "UsernameToken (Password in Digest)" and enter the User Credentials to be passed to the external system.

C. 1. Create an Integration Service and drag the "Web Service integration" from the palette to the canvas.

2.

Under Implementation, discover/browse the WSDL and select the operation.

3.

Under Security, select the "UsernameToken (Password in Digest)" and enter the User Credentials to be passed to the external system.

D. 1. Create a Web Service.

2.

Under Implementation, discover/browse the WSDL and select the operation.

3.

Under Security, select the "UsernameToken (Password in Digest)" and enter the User Credentials to be assed to the external system.

Correct Answer: C

QUESTION 5

A company's sales process relies on business rules that have been implemented within WebSphere Operational Decision Management (WODM). There is a requirement to incorporate these rules within a IBM Business Process Manager V8.0 implementation. What steps must a BPM application developer take to incorporate these rules within IBM Business Process Manager V8.0 assuming the WODM server has been properly configured within IBM Business Process Manager V8.0. Within a decision service:

A. 1. drag a BAL Rule from the palette onto the canvas.

2.

select a server .

3.

configure the SOAP port.

4.

provide credentials.

B. 1. drag a Server Script from the palette onto the canvas.

2.

use JavaScript APIs to get ODM server information.

3.

use JavaScript APIs to make ODM server calls.

C. 1. drag a Decision Table from the palette onto the canvas.

2.

select a server.

3.

specify conditions and actions.

D. 1. drag a JRules Decision Service from the palette onto the canvas.

2.

select a server.

3.

configure the SOAP port.

4.

provide credentials.

Correct Answer: D
