QUESTION 1

A BPM application developer has created a coach view that will be used for building user interfaces for several teams in the department. Before releasing the coach view into production, the department chair has asked the developer to present at the department meeting to allow other developers to become familiar with the coach view. A portion of the view is shown below:

What statement regarding the coach view will the developer make while presenting? Users of the coach view will be able to customize:

- A. specific instances of the view by setting multiple properties on the view instance.
- B. specific instances of the view by setting default values for the configuration options in the load event handler.
- C. the behavior of all instances of the coach view by setting the configuration options in the coach view definition.
- D. the behavior of all instances of the coach view by setting the configuration options in the validate event handler.

Correct Answer: A

QUESTION 2

A BPM application developer wants to reuse error handling flows for common errors that can be raised by any activity in a business process diagram and its subprocesses. How should the BPM application developer implement error handling?

- A. Create an event subprocess with the error handling flow and specify the errors to be handled in the properties of the error start event.
- B. Place an error event subprocess with the error handling flow in a toolkit and ensure a dependency to the toolkit is added to the process application.
- C. Place an error intermediate event as part of the service flow for all services that implement the activities. Connect the flow from those events to the same subprocess containing the error handling flow.
- D. Attach intermediate events to all activities, specify the errors to be handled and connect the flow from those events to the same subprocess containing the error handling flow.

Correct Answer: A

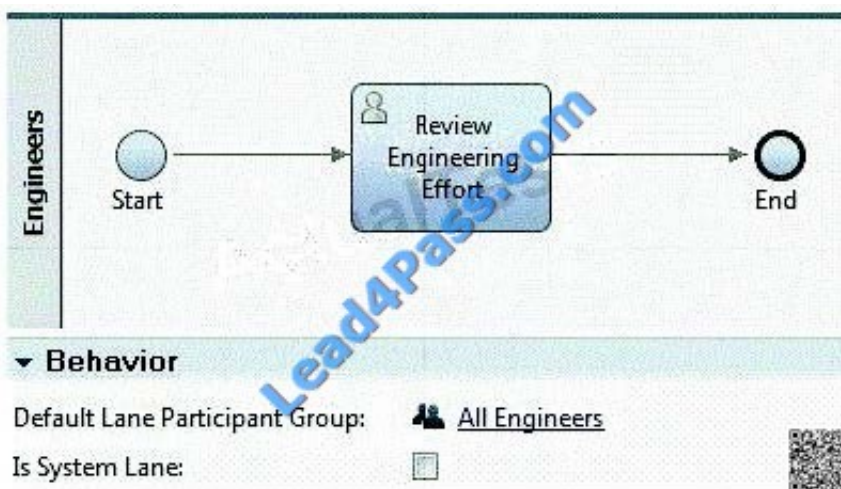

QUESTION 3

An engineering company has requested a process to handle its engineering reviews. The company breaks up its engineering reviews in the following ways:

- Complex engineering efforts are handled by the Senior Engineers participant group (PG)
- Moderate engineering efforts are handled by the Associate Engineers PG ?Simple engineering efforts are handled by the Apprentice Engineers PG
- All other engineering efforts are handled by the All Engineers PG

Review the business process diagram (BPD) below and the specified behavior of the Engineers Swimlane.

The Review Engineering Effort activity's assignment is based on a routing policy. The routing policy is dictated by the value of the BPD's local variable engineeringEffort. Which one of the following routing conditions for the Review Engineering Effort activity will satisfy the company's request?

A.

	engineeringEffort	Adv	Assign To
1	Complex	<input type="checkbox"/>	Senior Engineers
2	Moderate	<input type="checkbox"/>	Associate Engineers
3	Simple	<input type="checkbox"/>	Apprentice Engineers
