QUESTION 1

A BPM application developer needs to create a coach view to meet the following requirements:

1.The coach view must be able to be used to build several user interfaces. 2.The coach view must be able to be used to create other coach views. 3.The contents of an html element must be updated when the view's data changes. What steps must the BPM application developer take in order to meet these requirements? Write code to intercept modifications to the view's data and place it in the:

A. view event handler of the view instance and enable the view definition to be used as a template. A new coach view must be built using the template to support requirement 1.

B. view event handler of the view definition and enable the view definition to be used as a template. The template coach view can be used directly in coaches as well as other coach views.

C. change event handler of the view instance and enable the view definition to be used as a template. A new coach view must be built using the template to support requirement 1.

D. change event handler of the view definition and enable the view definition to be used as a template. The template coach view can be used directly in coaches as well as other coach views.

Correct Answer: D

QUESTION 2

In a loan origination process, the manager wants to be notified each time a loan approval activity takes more than 48 hours to complete regardless if work is in progress or not. The BPM application developer decides to implement the notification using a timer event attached to the loan approval activity.

How should the BPM application developer configure the timer event without closing the task?

A. C A.

▼ Boundary Event Details

Timer

Interrupt activity:

Repeatable:

▼ Timer Properties

Trigger On: After Start of Step

Custom Date:

Before/After Difference: 48 Hours

Tolerance Interval: 0 Hours

B. C B.

▼ Boundary Event Details

C. D.

Correct Answer: C

QUESTION 3

After deploying a snapshot onto the production server, the BPM application developer wants to have two development versions of the process application, one for the resolution of issues that needs to get fixed immediately in production and one for the development of new features.

How can the BPM application developer obtain the necessary development versions without creating a new process application?

A. Create a new snapshot for the process application.

- B. Create a clone of the snapshot installed in production.
- C. Create a new track from the snapshot installed in production.
- D. Import the snapshot installed in production into the Process Center.

Correct Answer: C

QUESTION 4

A company's sales process relies on business rules that have been implemented within WebSphere Operational Decision Management (WODM). There is a requirement to incorporate these rules within a IBM Business Process Manager V8.0 implementation. What steps must a BPM application developer take to incorporate these rules within IBM Business Process Manager V8.0 assuming the WODM server has been properly configured within IBM Business Process Manager V8.0. Within a decision service:

- A. 1. drag a BAL Rule from the palette onto the canvas.
2.
select a server .
3.
configure the SOAP port.
4.
provide credentials.
- B. 1. drag a Server Script from the palette onto the canvas.
2.
use JavaScript APIs to get ODM server information.
3.
use JavaScript APIs to make ODM server calls.
- C. 1. drag a Decision Table from the palette onto the canvas.
2.
select a server.
3.
specify conditions and actions.
- D. 1. drag a JRules Decision Service from the palette onto the canvas.
2.

select a server.

3.

configure the SOAP port.

4.

provide credentials.

Correct Answer: D

QUESTION 5

A BPM application developer has been asked to estimate the number of user story points needed to implement an activity within IBM Business Process Manager V8.0 based upon the following user story: As a Call Center Supervisor, I need to review the Call Center Representative's notes for any call that lasts longer than 15 minutes. Assuming this is the only user story that pertains to this activity, how must the BPM application developer proceed?

- A. Find out which system stores the call notes before providing an estimate.
- B. Build a prototype of the activity, so that an accurate estimate can be provided.
- C. Provide a user story estimate that is greater than 2, because there are two roles involved
- D. Ask a user story owner to revise the user story, so that it includes the business value statement.

Correct Answer: D
