QUESTION 1

A user has several devices. He\\'s using the application from all of them. Is it possible to send a push notification to a specific device?

- A. No, once Worklight server submits push notification it will be delivered to all of user\\'s devices
- B. Yes, userSubscription contains deviceSubscription objects for each device user ever registered for push notifications from. It can be used to send notification to a specific device.
- C. Yes, once Worklight server submits push notification it will be delivered to the last user of the device
- D. No, this is considered a security breach. If the user has more than one device notification will not be sent at all

Correct Answer: B

QUESTION 2

A Worklight mobile application needs to aggregate news about stock symbols in a portfolio using Worklight adapters and server-side JavaScript.

Given the following high-level schema for aggregation,

- 1.The application calls getPortfolioNews from the SQLPortfolioAdapter.
- 2.The SQLPortfolioAdapter retrieves a list of stock symbols in the portfolio from the adapter\\'s SQL datasource by calling getStockSymbolList.

- A. For each of the stock symbols in the portfolio, The SQLPortfolioAdapter calls getStockNews from HTTPStockNewsAdapter with the stock symbol as parameter.
- B. HTTPStockNewsAdapter retrieves news from the stock news HTTP API and returns it to SQLPortfolioAdapter.
- 3.SQLPortfolioAdapter returns portfolio news to the application. Which procedure(s) must be declared in the SQLPortfolioAdapter.xml file?
 - C. getPortfolioNews
 - D. getPortfolioNews and getStockNews
 - E. getPortfolioNews and getStockSymbolList
 - F. getPortfolioNews, getStockSymbolList and getStockNews

Correct Answer: A
