QUESTION 1

A developer is invoking a SQL adapter procedure from a mobile application. The procedure is named `getModelByYear` and returns data from a table named `Auto` as follows:

ID	Make	Model	Year
0	Ford	Focus	2005
1	Buick	Regal	2010
2	Jeep	Liberty	2009
3	Dodge	Caliber	2008

Which option represents the returned data when the procedure is invoked with the parameter 2005?

- A. {
 'isSuccessful' : true,
 'resultSet' : { 'Make' : 'Ford', 'Model' : 'Focus' }
}
- B. {
 'isSuccessful' : true,
 'resultSet' : [{ 'Make' : 'Ford', 'Model' : 'Focus' }]
}
- C. {
 'isSuccessful' : true,
 'resultSet' : { 'Ford', 'Focus' }
}
- D. {
 'isSuccessful' : true,
 'resultSet' : [{ 'Ford', 'Focus' }]
}

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: B

QUESTION 2

A company discovers a bug in one of the HTML pages of a Worklight hybrid mobile application that it has recently

published to the Android Google Play store. It has fixed the bug and re-deployed the application to the production Worklight Server without changing its version number. Which additional administrative step, if any, must be performed for the update to take effect the next time a user accesses the application on a device?

- A. No additional administrative steps are required.
- B. Re-publish the application to the Android Google Play store.
- C. Change the application status to Updated in the Worklight Console.
- D. Change the application status to Updated in the Worklight Console and re-publish the application to the Android Google Play store.

Correct Answer: A

QUESTION 3

Is it possible to detect current device language and locale?

- A. Yes, using WL.App.getDeviceLocale and WL.App.getDeviceLanguage APIs
- B. Yes, using WL.App.getDeviceLanguageSettings API
- C. It is only possible to detect the device language by using WL.App.getDeviceLanguage
- D. No, it is not possible

Correct Answer: A

QUESTION 4

Which three components must be implemented when defining an authentication realm? (Choose three.)

- A. Authenticator
- B. Login module
- C. Identity validator
- D. Challenge handler
- E. Security certificate
- F. Encryption module
- G. Secure connection

Correct Answer: ABD

QUESTION 5

A developer created an encrypted cache with the `WL.EncryptedCache.open` function. When the function is triggered, the following status code is returned:

`WL.EncryptedCache.ERROR_SECURE_RANDOM_GENERATOR_UNAVAILABLE` What does this status code mean?

- A. The encrypted cache was created successfully, though it was only secured by a user provided password.
- B. The application failed to create the encrypted cache because the Worklight server was unavailable for some reason.
- C. The encrypted cache already existed with a previously created random key, so it was not possible to create it again with a new key.
- D. The application failed to create the encrypted cache, because there was no parameter provided in the function call to generate the randomkey.

Correct Answer: B
