QUESTION 1

Which of the following is a key benefit to customers who deploy zEnterprise compared to other solutions?

- A. A hypervisor infrastructure that allows movement of an application online between different architectures
- B. A hypervisor and hardware management across multiple platforms.
- C. A management solution that provides support across multiple x86 hypervisors.
- D. A management solution for the complete multi-vendor infrastructure within a datacenter.

Correct Answer: B

QUESTION 2

A post installation support plan must be in place after the sale of the System z. Which of the following is the best way to do this?

- A. Discuss typical problem resolution with the customer technical staff
- B. Create a formal Customer Support Plan document and review it with the customer for agreement
- C. The hardware SSR/CE is responsible for the post install support plan, the technical specialist should ensure this is complete
- D. The technical specialist should create a list of help desk phone numbers and hardware dispatch contacts to review with the customer

Correct Answer: B

QUESTION 3

A customer is planning an upgrade to a z114. They have indicated that they will be adding additional disk storage in the future and want to make sure they have room for non disruptive future I/O growth. Which of the following is the appropriate first action for the Technical Specialist?

- A. Use the eConfig Plan Ahead feature to place an order for an additional I/O drawer but don't order any cards until they need them.
- B. Ask the sales specialist to give the customer a discount and order the cards at the end of the quarter
- C. Carefully plan out the upgrade based upon the current I/O configuration. Confirm there is enough room to support and add a future I/O drawer if needed.
- D. The z114 hardware model M10 has more I/O adapters so you should order the M10 model which will assure you have room for future growth.

Correct Answer: C

QUESTION 4

Which of the following customer environments would be the fit for the placement of a zBX?

- A. Customers with a large Intel environment that are running a mix of old and new servers running a mixture of Windows operating systems releases
- B. Customers already running a IBM System Analytics solution on POWER.
- C. A customer that is running a legacy application in a multi-tier environment where the database is running on System z and the application servers are running on HP servers running a current Linux release.
- D. A customer that is already running an XI50 DataPower solution and wants to relocate their XI50 blades over into a zBX to take advantages of the Unified Resource Manager Qualities of Service.

Correct Answer: C

QUESTION 5

Which of the following includes major components needed to place an IBM zEnterprise into a Parallel Sysplex clustered environment?

- A. A coupling facility, two z/OS partitions, STP and coupling links
- B. A coupling director, a z/OS and a VSE partition, STP and coupling links
- C. A coupling director, a z/OS partition, a zBX, STP and coupling connectors
- D. A coupling facility, a z/OS and an AIX partition, STP and coupling connectors

Correct Answer: A
