Following Questions and Answers are all new published by IBM Official Exam Center

QUESTION 1

Which is a key capability offered by IBM UrbanCode Deploy in a release and deployment solution?

A. Asset Repository, Environment Configuration, Delivery Pipeline

B. Workload Provisioning, Workload Orchestration, Service Management

C. Environment Discovery and Analytics, Build Automation, Test Automation

D. Requirements Management, Application Performance Management, Project Planning

Correct Answer: A

QUESTION 2

Which three must be installed to have a working installation of IBM UrbanCode Deploy? (Select three.)

A. Urbancode agent monitor

B. Urbancode Deploy agent

C. Database

D. Urbancode Deploy server

Correct Answer: BCD

A IBM UrbanCode Deploy installation consists of the IBM UrbanCode Deploy server, a database, and at least one agent.

QUESTION 4

The approval process is executed when approved by which user type?

A. The user type currently configured to execute the process

B. The administrator user type

C. The user type configured for approval in the approval process being executed

D. The user type of the user created both the application processes and the component processes

Correct Answer: C

Deployment approvals are created in a process that specifies the job that needs approval and the role of the approver. When a request for approval is made, the users with the corresponding role are notified of the work item through email. The approver has the liberty to approve or reject a deployment as well as provide comments to the decision. QUESTION 5

IBM UrbanCode Deploy (UCD) offers an integration with Chef. How does this integration work?

A. IBM UCD installs Chef solo as part of the deployment process and also allows users to execute Chef nodes.

B. IBM UCD integrates with Chef server and manages updating Chef endpoints by running scripts against the Chef server.

C. Chef server and Chef solo poll the IBM UCD repository for new artifacts to deploy, and then deploy them.

D. Chef server and Chef solo allows for the IBM UCD agent to be automatically installed on Chef endpoints.

Correct Answer: C

Incorrect Answers:

A: Set up a UCD server with the Chef plug-in installed.

To use the IBM Integration Bus cookbook with UCD, you must install the Chef plug-ins, as these are not

there by default.
