QUESTION 1

You have multiple application environments sharing the same resource. What will you see in the inventory of this resource?

- A. Only the versions of components deployed from one application
- B. All versions of all components deployed from the sharing applications
- C. Last versions of all components deployed from the sharing applications
- D. Only the last version of the component deployed from the application that was used last

Correct Answer: B

The intention is that you could look at the resource tree on the environment detail page to see all versions currently deployed to resources in that environment.

QUESTION 2

Property resolution is used in many places. What is the correct format for resolving a property named "portNumber" at the environment scope?

- A. \${p:environment:portNumber}
- B. \${p/environment/portNumber}
- C. \${environment:portNumber}
- D. \${p:environment/portNumber}

Correct Answer: D

The environment property referenced: \${p:environment/propertyName}.

QUESTION 4

What happens to a process when a new version of a used plugin is uploaded into an instance of IBM UrbanCode Deploy?

- A. Nothing happens because the process continues to use the versions of steps that were defined in the previous version of the plugin.
- B. IBM UrbanCode Deploy provides a message that the process might be impacted by new step versions which are available in the new plugin version.
- C. The process steps automatically are updated to use the versions that are provided in the new plugin version.
- D. In current versions of the tool, the processes unfortunately become broken and must be manually repaired.

Correct Answer: C

QUESTION 5

Which statement is true about importing files into component versions from the file system?

- A. Component versions can only be imported from the file system via the UCD server process over port 2776.
- B. Component versions can only be imported from the file system using an agent installed on the IBM UrbanCode Deploy server.
- C. Any agent listed in the system settings can be used to import component versions from the file system.
- D. Any agent selected in the file import plug-in can be used to import component versions from the file system.

Correct Answer: D
