QUESTION 1

Which of the following is a complete description of the process involved in creating a valid

- A. Create a new Index class containing the index attributes and add a named association between this class and the target Entity class
- B. Create a new Struct class containing the index attributes and add a named association with stereotype index between it and the target entity class
- C. Create a new Entity class with an attribute of stereotype index and add an association with stereotype index between it and the target Entity class
- D. Create a new Association class with an attribute of stereotype index and add an association between it and the target Entity class

Correct Answer: B

QUESTION 2

Which of the following are valid non-key stereotypes for entity operations?

- A. nkdelete
- B. nkread
- C. nkinsert
- D. nkremove
- E. nkreadmulti

Correct Answer: BDE

QUESTION 3

Examine the following piece of code:

```
package serverworkshop.impl;

import serverworkshop.struct.*;
import curam.util.exception.*;

public abstract class MaintainPerson
    extends serverworkshop.intf.MaintainPerson {

    public void insertPerson(MaintainPersonDetails dtls) throws ApplicationException, In:

        PersonDtls personDtls = new PersonDtls();

        serverworkshop.intf.Person personObj = serverworkshop.fact.PersonFactory.ne

        personDtls.concernRoleID = dtls.concernRoleID;
        personDtls.firstName = dtls.firstName;
        personDtls.lastName = dtls.lastName;
        personDtls.title = dtls.title;
        personDtls.gender = dtls.gender;
        personDtls.dateOfBirth = dtls.dateOfBirth;

        personObj.insert(personDtls);

    }
}
```

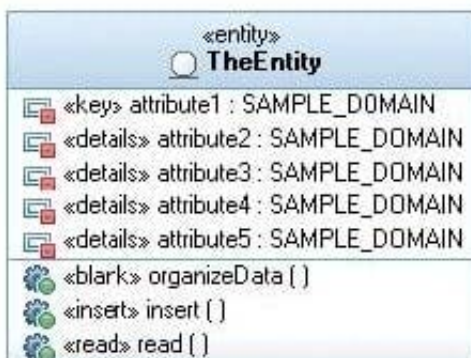

Which of the following statements about this piece of code is true?

- A. It does not compile because an import statement is missing
- B. It does not compile because the PersonDtls object must be obtained from a factory class
- C. It does not compile because the MaintainPerson should not extend the class serverworkshop.intf.MaintainPerson
- D. It compiles without errors

Correct Answer: C

QUESTION 4

Review the following model:

Based on the model shown above, what will be the result of a build generated command?

- A. Build Failed: The entity named TheEntity cannot have a non-default stereotyped operation
- B. Build Successful (Warning: Unrecognized stereotype '\\blank\\' in entity named TheEntity)
- C. Build Failed: The entity named TheEntity defines an operation stereotyped using a reserved keyword '\\blank\\'
- D. Build Successful

Correct Answer: B

QUESTION 5

Which of the following statements about SQL host variables in Cúram are true? Which of the following statements about SQL host variables in Cúram are true?

- A. All parameter host variables must be included in the argument struct.
- B. All host variables must be prefixed by a colon.
- C. All return host variables must be included in the return struct.
- D. Host variables are not case sensitive.
- E. In custom entity SQL, each host variable should consist of the data type plus variable name.

Correct Answer: ABC
