**QUESTION 1**

A large retailer believes their In-Transit supply is more reliable than their Planned Purchase Order supply for the purposes of Order Promising. Therefore, they want to exclude 60% of the Planned Purchase Order Supply Type when promising, and they want to exclude only 10% of the In-Transit Supply Type.

Which IBM Sterling Order Management configuration should be considered?

- A. In Catalog Management, configure the high velocity item classification with a safety factor of 60% and the low velocity item classification with a safety factor with 10%
- B. In Supply Collaboration, configure the Planned Purchase Order supply type with a safety factor of 60% and the In-Transit supply type with a safety factor of 10%
- C. In Distributed Order Management, configure the default schedule rule with a safety factor of 60%
- D. In Global Inventory Visibility, configure the Planned Purchase Order supply type with a safety factor of 60% and the In-Transit supply type with a safety factor of 10%

**QUESTION 2**

A large retailer sells home theater packages together with an optional, billable, installation service. To date, the installation service has only been available to customers who purchase the home theater package from the large retailer. To be competitive, and to tap into an additional source of revenue, the retailer would now like to sell the installation service as a stand-alone service, eliminating the need for a customer to first purchase the home theater package from them. An implementation professional must configure the IBM Sterling Order Management system to allow the retailer's CSRs to sell the home theater installation service as a stand-alone service.

Which course of action is the MOST appropriate?

- A. Create a "special service item to satisfy the retailer's request
- B. Create a procedure that associates the installation service with a zero cost "ghost" home theater package
- C. Configure a multi-price type to include the installation charge along with the home theater price
- D. Create a provided service item in IBM Sterling Business Center with the option "Association with product is required" checkbox cleared
