QUESTION 1

A developer has created two FTP Client adapters '\\FtpClient1\\' and '\\FtpClient2\\' and placed them in the '\\FtpClientGroup\\' Service Group. What is the proper way to invoke these adapters in a clustered environment to allow for maximum availability?

- A. FtpClientGroup
- B. FtpClient1 | FtpClient2
- C. FtpClientGroup
- D. D. FtpClient1 FtpClient1FtpClient2

Correct Answer: C

QUESTION 2

When a file arrives it must be archived. The ProcessFileArrival and ArchiveFile Business Processes (BP) handle this. The requirement is for ProcessFileArrival to invoke ArchiveFile, but not wait for ArchiveFile to finish before further processing. Which invoke mode should be used?

- A. Inline
- B. Async
- C. Queued
- D. Deferred

Correct Answer: B

QUESTION 3

A mapping specialist is testing a map that has been created. For some reason an extended rule on an output element is not executed. What is the most probable reason?

- A. The element is not in a group.
- B. There is no link to the element.
- C. Extended rules are not executed on the output side.
- D. Extended rule on the input side ran nullifying the output side.

Correct Answer: B

QUESTION 4

In an order process, three JDBC queries need to be executed against three separate databases: 1. Decrease inventory by the ordered volume to reserve inventory (in the inventory database) 2. Check the customer credit limit in a table (in the

customer database) 3. Insert the order details in the order table (in the order database) If, for example, the credit limit check fails, the inventory needs to be restored.

Which service can be of help in this situation?

- A. End Transaction Service
- B. Lightweight JDBC Adapter
- C. Rollback Database Service
- D. Restore Business Process Service

Correct Answer: A

QUESTION 5

A developer has been tasked with writing a communications process to connect to a partner SFTP server and get order files. Authentication of the user is being performed by a key signature to the partner SFTP server. Which two keys are required for establishing an SFTP session to the SFTP server? (Choose two.)

- A. Known Host Key
- B. Host Identity Key
- C. User Identity Key
- D. Remote Host Key
- E. Authorized User Key

Correct Answer: AC
