QUESTION 1

A developer has created a new Business Process (BP) and needs to physically check the BP into the system with the document storage type specifically set. What are three supported modes of document storage?

- A. User
- B. Queue
- C. Shared
- D. Inherited
- E. Database
- F. File System

Correct Answer: DEF

QUESTION 2

A company would like to maintain communication adapter availability in the event of IBM Sterling B2B Integrator (SBI) being shut down for maintenance. What can be deployed to maintain adapter communications?

- A. Service Group
- B. Clustered Node
- C. Perimeter Server
- D. Adapter Container JVM

Correct Answer: D

QUESTION 3

A company requires FTP users to be unable to login after five failed login attempts. How can this be accomplished?

- A. Create a Lockout Policy.
- B. Configure the FTP user account.
- C. Configure a LoginPolicy service configuration.
- D. Add an entry to customer_overrides.properties.

Correct Answer: A

QUESTION 4

How can a real-time overview of all the defined JDBC pools within a system be viewed?

- A. Threads
- B. System Status
- C. Host Information
- D. Database Usage

Correct Answer: D

QUESTION 5

A customer has deployed a two node active-active IBM Sterling B2B Integrator (SBI) cluster in the secure zone on two servers. The customer has installed two servers in the DMZ for the purpose of installing remote SBI Perimeter Servers to facilitate communications with external partners. External partners will connect to an external IP Load Balancer that will distribute inbound FTP/S, SFTP and HTTP Client sessions across the Perimeter Servers. The customer requirement is that if any single server fails, all the other SBI nodes and remote Perimeter Server instances must continue to actively handle inbound sessions for each protocol. What is the minimum number of remote Perimeter Server instances that must be deployed in the DMZ?

- A. 2
- B. 3
- C. 4
- D. 12

Correct Answer: C
