QUESTION 1

What does the preschedulecmd option accommodate?

- A. It enables deduplication on the client.
- B. It tests out a schedule prior to running.
- C. It gives this schedule higher priority over other schedules.
- D. It executes an operating system command before the scheduled action.

Correct Answer: D

Explanation: The preschedulecmd option specifies a command that the client program processes before it runs a schedule. The client program waits for the command to complete before it starts the schedule.

QUESTION 2

What is the purpose of the command Query Actlog search=...?

- A. It starts a backup using the console.
- B. It searches for the active log directory.
- C. It lists administrators with search capability.
- D. It finds an entry in the activity log by entering text.

Correct Answer: B

Explanation: Example: Task

Search the activity log for any message that contains the string "delete". The output includes only messages produced during the past hour.

Command query actlog search=delete

QUESTION 3

Disk drives are used for which two types of storage pools?

- A. disk storage pool
- B. variable access storage pool
- C. remote access storage pool when configured as a NAS device class
- D. remote access storage pool when configured as a SAN device class
- E. sequential access storage pool when configured as a FILE device class

Correct Answer: AD

Explanation: A: Device Class: Disk Storage volumes that reside on the internal disk drive

Tivoli Storage Manager devices can be physical, such as disk drives and tape drives, or logical, such as files on disk or storage on another server.

D: A NAS is a file server.

Not E: Files on Disk as Sequential Volumes (FILE) This device type allows you to create sequential volumes by creating files on disk storage. To the server, these files have the characteristics of a tape volume.

QUESTION 4

Which scheduling mode is initiated by the server contacting a registered client?

- A. All
- B. Polling
- C. Initiated
- D. Prompted

Correct Answer: D

Explanation: Tivoli Storage Manager provides two scheduling modes: client- polling and server-prompted.

QUESTION 5

What is an incremental by date backup?

- A. It backs up files that have never been backed up before.
- B. It backs up files that have been previously backed up using snapshot backup.
- C. It backs up files with a modification date and time that is later than that of the last full incremental backup of the same files in that filesystem.
- D. It backs up files with a modification date and time that is the same as that of the last full incremental backup of the same files in that filesystem

Correct Answer: C

Explanation: The client backs up only those files whose modification date and time is later than the date and time of the last incremental backup of the file system on which the file resides. Files added by the client after the last incremental backup, but with a modification date earlier than the last incremental backup, are not backed up.
