**QUESTION 1**

Customers are complaining that a particular web site is "hanging". To troubleshoot the problem, a system administrator decides to trigger several thread dumps to determine which threads might be hung. How can the administrator trigger the thread dumps?

- A. Use wsadmin to execute the dumpThreads command for the application server.
- B. Run the collector command line script with the -Summary option set to "yes".
- C. Set the node agent's custom property "com.ibm.websphere.threadmonitor.dump.java" to true.
- D. From the Integrated Solutions Console (ISC), click the System dump button for the application server.

Correct Answer: A

---

**QUESTION 2**

A system administrator needs to install the IBM Installation Manager for WebSphere Application Server Network Deployment V8.0 using a non-root account. What step must the administrator take so that the installation can be managed by two different non-root user accounts? Install the IBM Installation Manager:

- A. in group mode.
- B. in non-administrator mode.
- C. using the configurator administrator role.
- D. using a primary and secondary account.

Correct Answer: A

---

**QUESTION 3**

A system administrator needs to improve performance of a WebSphere Application Server runtime. The computations of JavaServer Pages (JSP), servlets, portlets, Web services and WebSphere commands should be performed once and served from memory.

What should the administrator configure?

- A. Caching Proxy
- B. Edge Components
- C. Dynamic cache service
- D. WebSphere eXtreme Scale

Correct Answer: C

---

## QUESTION 4

A system administrator needs to identify the performance of a database application and JDBC connection pool, CPU usage time and response time. Which tools should the administrator use to get this data?

- A. Client program
- B. Request metrics
- C. Custom Java code
- D. Heap dump analyzer
- E. Performance Monitoring Infrastructure (PMI)

Correct Answer: BE

---

## QUESTION 5

A system administrator needs to use wsadmin to execute commands interactively. The WebSphere cell has global security enabled. To avoid the security login dialog when executing wsadmin, the administrator should:

- A. edit the sas.client.props file.
- B. edit the wsadmin.properties file.
- C. use the argument -user .
- D. login in to the local operating system (local OS) with an administrator user id.

Correct Answer: A
