QUESTION 1

Which is true about software repositories for IBM Installation Manager?

A. Repositories must be local.

B. Repositories must be online.

C. Repositories can be either local or online.

D. Repositories are only in the media package.

Correct Answer: C

IBM Installation Manager is a single installation program that can use remote or local software repositories to install, modify, or update certain IBM products. It determines and shows available packages, checks prerequisites and interdependencies, and installs or modifies the selected packages. You also use IBM Installation Manager to uninstall the packages that it installed.

QUESTION 3

How can the administrator change the console session expiration for the Integrated Solutions Console?

A. Modify timeout value and run the timeout.jacl script.

B. Set the timeout value in the Console Preferences panel.

C. Use the settimeout wsadmin command and specify the value.

D. Set the ConnectionResponseTimeout value in the Integrated Solutions Console.

Correct Answer: A

Change the on the two lines of the timeout.jacl script to the new session expiration value. This number specifies the number of minutes the console preserves the session during inactivity.

QUESTION 4

To write a Jython script to stop a running application server, an administrator should use which administrative object?

A. AdminApp

B. AdminTask

C. AdminConfig

D. AdminControl

Correct Answer: D

You can use the wsadmin tool to stop applications.

There are two ways to complete this task. Firstly, you can use the AdminControl object to stop the

application. Alternatively, you can use the scripts in the AdminApplication script library to start, stop, and

administer your application configurations.
