**QUESTION 1**

Which of the following checks for master data and key figures does the Check Mode algorithm trigger? Note: There are 3 correct Answers to this question.

- A. It checks whether the sourcing in the Production Source Item Master Data type exists.
- B. It checks whether the location resource specified in the master data forms a cycle in the supply chain network.
- C. It checks whether the heuristic detects cycles formed by nodes (such as location products) in the supply chain network.
- D. It checks whether the location products specified in the master data are connected by customer sourcing rules within the supply chain network.
- E. It checks whether the required planning level master data exists for a subset of input key figures.

Correct Answer: CDE

---

**QUESTION 2**

You created a key figure and want to add calculations. Which of the following rules do you consider? Note: There are 2 correct Answers to this question.

- A. All key figure calculations have calculation inputs, which can be marked as stored or calculated.
- B. The calculation chain for a key figure must always result in a calculated key figure.
- C. Aggregation calculations using SUM or MAX functions must be based on a higher aggregation U level.
- D. Key figures can be calculated across different planning levels.

Correct Answer: AD

---

**QUESTION 3**

What type of key figure requires a planning level to have all attributes as roots?

- A. The conversion key figure, such as exchange rate
- B. The special key figure marked as an aggregate key figure
- C. The time independent key figure, such as FCSTMAPE
- D. The attribute transformation key figure, such as PERIODID1

Correct Answer: B

---

**QUESTION 4**

Which of the following solutions are feasible when using the time series supply optimizer? Note: There are 3 correct Answers to this question.

- A. Violation of minimum aggregated inventory values
- B. Not adhering to maximum transport values
- C. Not-fully satisfied demands
- D. Not respecting production capacity
- E. Violation of minimum resource utilization

Correct Answer: ACE

---

## QUESTION 5

You want to display and edit data in different units of measure (UOM). Which of the following must you consider before you use UOM? Note: There are 3 correct Answers to this question.

- A. Analytics provide the user with the option to select the target unit of measure.
- B. Unit of measure is an attribute of a master data type, such as Product.
- C. Units of measure are usually not time-dependent.
- D. Units of measure are usually not time-independent.
- E. Conversion to the target unit of measure is handled by functionality of SAP IBP Excel UI

Correct Answer: ABC
