QUESTION 1

How does SAP Master Data Governance (MDG) ensure that the same object on an entity levels NOT processed in different change requests?

Please choose the correct answer.

A. The object is locked when it is assigned to a change request until the change request step defined in SAP MDG customizing as \\\'unlocking step\\\' is executed.

B. The object is locked when it is assigned to a change request until the current change request processor forwards the change request to the next processor in the governance process.

C. The object is locked when it is assigned to a change request until the corresponding change request is withdrawn or finally approved.

D. The object is locked when it is assigned to a change request until the object is successfully saved and validated.

Correct Answer: B

QUESTION 2

MDG for Materials makes reuse of existing technologies for the replication of the materials and related data to other connected business systems.

A. SOA to connect to third-party systems, but also to import data.

B. ALE for connected SAP ERP or third-party systems.

C. CIF to connect to SAP SCM.

D. None of the above.

Correct Answer: ABC

QUESTION 3

Where can you monitor data replicate on? There are 2 correct answers to this question.

A. Application log

B. SAP Master Data Governance analytics

C. Search result list

D. Dedicated DRFLOG transaction

Correct Answer: AD

QUESTION 4

What are the features of MDG communicator configuration?

A. It includes a reference to an UIBB of the OVP that supplies the MDG Communicator at runtime with the information about the main entity.

B. On a technical level, it creates a wire from this UIBB to the Change Request UIBB (using the same parameters as for other wires in the OVP).

C. Add a reason for your change request type with the pattern b) SFZ## by adding them and specify a reason.

D. Call transaction a) MDGIMG. Find under General Settings Process Modeling Change Requests Define Rejection Reasons for Change Requests

Correct Answer: AB

QUESTION 5

What are the elements of a complete UI configuration?

A. One FPM application configuration for USMD_OVP_GEN, which can include one FPM adaptable OVP configuration for CBA

B. Supports integration scenarios based on a Service Oriented Architecture (SOA) especially used WEB-Services,

C. Integrates into existing integration technologies e.g. Application Link Enabling (ALE) especially Intermediated Documents (IDoc).

D. Allows for an easy "growth path" from existing technology to SOA because it wraps the different communication channels

Correct Answer: A
