QUESTION 1

Why Describe the Data Selected? In order for Automated Analytics features to interpret and analyze your

data, the data must be described.

To put it another way, the description file must specify the nature of each variable, determining their:

Note: There are 2 correct answers to this question.

A. Storage format: number

B. Type: continuous, nominal, ordinal or textual

C. A Java Runtime Environment installed on the client machine to connect to the server

D. A valid SAP Predictive Analytics License

Correct Answer: AB

QUESTION 2

To generate a time series model, you must select a partition strategy to cut your training dataset into the three sub-sets:
training, validation and testing. Since the order of the observations in the dataset is important for the modeling, only two
types of partition strategies are available in time series:

Note: There are 2 correct answers to this question.

A. Sequential with Testing

B. Sequential without Testing

C. In the IIS Administrative Tools pane, click Internet Information Services (IIS) Manager.

Correct Answer: AB

QUESTION 3

On the plot, for each type of model, the curves represent: Note: There are 2 correct answers to this question.

A. When the target is nominal, the realizable profit (on the Y axis) as a function of the ratio o f the observations correctly
selected as targets relative to the entire initial dataset (on the X axis)

B. When the target is continuous, the predicted value or score on the X axis In respect with the actual value or target
value or target (on the Y axis)

C. A valid SAP Predictive Analytics License

Correct Answer: AB

QUESTION 4

To Validate the Model Generated :

Note: There are 2 correct answers to this question.

A. Verify the Predictive Power Automated Analytics User Guides and Scenarios Modeler If the performance of the model meets your requirements, go to Step 3 - Analyzing and Understanding the Model Generated. Otherwise, go to the procedure To Generate a New Model.

B. You can also check other indicators provided in addition to KI and KR during the model generation. For example, you could view the total elapsed time required to generate the model and information on the standard error rate.

C. A web server such as Apache Web Server or Windows Internet Information Services (IIS).

Correct Answer: AB

QUESTION 5

Two indicators specific to Automated Analytics allow you to evaluate the performance of a model. Note: There are 2 correct answers to this question.

A. The predictive power, which is the quality indicator of the model, Automated Analytics User Guides and Scenarios Modeling Concepts P U B L I C 27

B. The prediction confidence, which is the robustness indicator.

C. Through Java Web Start: in this mode, a Web server needs to be installed and configured on the machine hosting the SAP Predictive Analytics server. It will deliver, through web pages, the necessary content in order for the client computer to run the app

Correct Answer: AC
