QUESTION 1

Obtaining a better model is achieved by:

Note: There are 3 correct answers to this question.

- A. Improving the prediction confidence of the model
- B. Improving the predictive power of the model
- C. System authentication is to be used through Pluggable Authentication Module (PAM). Access to Linux System account password required root privileges.
- D. Improving both the predictive power and the prediction confidence of the model.

Correct Answer: AB

QUESTION 2

Operation of Automated Analytics:

Note: There are 3 correct answers to this question.

- A. Automated Analytics allows you to perform supervised data mining, that is, to transform your data into knowledge, then into action, as a function of a domain-specific business issue.
- B. The application supports various formats of source data order to be usable by the application features, the dataset to be analyzed must be presented in the form of a single table of data, except in instances where you are using the Event Logging or Sequence Coding features of Data Manager.
- C. To use the application's features, you must have a training dataset available that contains the target variable with all its values defined. Then, you can apply the model generated using the training dataset to one or more application datasets.
- D. The Predictive Factory server contains a group of services handled by the Server Intelligence Agent (SIA). The services can be stopped and started with the Start and Stop Predictive Factory commands

Correct Answer: ABC

QUESTION 3

Once the modeling parameters are defined, you can generate the model. Then you must validate its performance using the predictive power.

Note: There are 2 correct answers to this question.

- A. If the model is sufficiently powerful, you can analyze the responses that it provides in relation to your business issue apply it to new datasets
- B. Otherwise, you can modify the modeling parameters in such a way that they are better suited to your dataset and your business issue, and then generate new, more powerful models.

- C. The Progress Bar displays the progression for each step of the process. It is the screen displayed by default.
- D. The Detailed Log displays the details of each step of the process.

Correct Answer: AB

QUESTION 4

There are two ways to define a variable structure:

Note: There are 2 correct answers to this question.

- A. by first extracting the categories from the variable statistics, then editing or validating the suggested structure.
- B. by importing the structure from an existing model.
- C. by building a new structure from scratch.
- D. if the user running SAP Predictive Analy

Correct Answer: AB

QUESTION 5

In Model Manager with default configuration, which access privileges provide the "server usage" statistics? Note: There are 2 correct answers to this question.

- A. IT Administrator
- B. Server Owner
- C. Business Owner
- D. IT Supervisor

Correct Answer: BD
