QUESTION 1

Why Describe the Data Selected? In order for Automated Analytics features to interpret and analyze your

data, the data must be described.

To put it another way, the description file must specify the nature of each variable, determining their:

Note: There are 2 correct answers to this question.

A. Storage format: number

B. Type: continuous, nominal, ordinal or textual

C. A Java Runtime Environment installed on the client machine to connect to the server

D. A valid SAP Predictive Analytics License

Correct Answer: AB

QUESTION 2

Depending on the type of the target, the model graph plot allows you to:

Note: There are 3 correct answers to this question.

A. View the realizable profit that pertains to your business issue using the model generated when the target is nominal.

B. Compare the performance of the model generated with that of a random type model and that of a hypothetical perfect model when the target is nominal.

C. A web server such as Apache Web Server or Windows Internet Information Services (IIS).

D. Compare the predicted value to the actual value when the target is continuous .

Correct Answer: ABD

QUESTION 3

Two indicators specific to Automated Analytics allow you to evaluate the performance of a model. Note: There are 2 correct answers to this question.

A. The predictive power, which is the quality indicator of the model, Automated Analytics User Guides and Scenarios Modeling Concepts P U B L I C 27

B. The prediction confidence, which is the robustness indicator.

C. Through Java Web Start: in this mode, a Web server needs to be installed and configured on the machine hosting the SAP Predictive Analytics server. It will deliver, through web pages, the necessary content in order for the client computer to run the app

Correct Answer: AB

QUESTION 4

In the large majority of cases, a first degree polynomial is sufficient for generation of a relevant and robust model. Using a higher degree of polynomial does not always guarantee better results than those obtained with a first degree polynomial. In addition, the higher the degree of polynomial you select:

Note: There are 3 correct answers to this question.

A. The more time needed to generate the corresponding model

B. The more time needed to apply the model to new datasets

C. The harder it is to interpret the results of modeling

D. The server pass phrase (optional)

Correct Answer: ABC

QUESTION 5

Whatever the data source used, the following two constraints must be accommodated: Note: There are 2 correct answers to this question.

A. The data must be represented in the form of a single table, except in instances where you are using the Event Logging or Sequence Coding features.

B. The target variable must be defined for each observation in the table. In the sample file Census01.csv , the variable "class" has been be defined for each individual.

C. Through Java Web Start: in this mode, a Web server needs to be installed and configured on the machine hosting the SAP Predictive Analytics server. It will deliver, through web pages, the necessary content in order for the client computer to run the application.

Correct Answer: AB
