**QUESTION 1**

Concerning some (CCMS) monitoring terminology, which of the following statements are correct? (Choose three)

- A. Each MTE can only be used in exactly one customer-defined monitor definition at a time.
- B. Each monitoring attribute is assigned to exactly one monitoring object.
- C. A monitoring attribute is also a monitoring tree element (MTE).
- D. A monitoring object can have more than one assigned monitoring attribute.

Correct Answer: BCD

---

**QUESTION 2**

In which of the following scenarios is RFC communication used as the standard communication method in SAP systems? (Choose three)

- A. RFC communication is used for transferring monitoring data between SAP systems.
- B. RFC communication is used for exchanging information between the ICM process and a web browser.
- C. RFC communication is often used for exchanging business data between different SAP systems.
- D. RFC communication is used for exchanging user data between AS ABAP-based SAP systems and the LDAP connector.

Correct Answer: ACD

---

**QUESTION 3**

Tuning the performance of an SQL Server instance includes configuring the memory used by this instance on a given host. An optimal memory configuration depends on several aspects such as; memory requirements of the SQL Server itself, hardware resources, other applications installed on the host, or internal usage of the values of the two most important SQL Server parameters - min server memory and max server memory. For which exact purposes can the database administrator use these parameters? (Choose two)

- A. To determine the maximum size of memory used by the whole SQL Server system with help of max server memory
- B. To determine the maximum size of the buffer pool, because it never increases its memory allocation above the value specified in max server memory
- C. To determine the minimum size of the buffer pool, because it never drops its memory allocation below the value specified in min server memory
- D. To determine the maximum size of the data cache, because it never increases its memory allocation above the value specified in max server memory
- E. To determine the minimum size of the data cache, because it never drops its memory allocation below the value specified in min server memory

Correct Answer: B

---

#### QUESTION 4

Which program, on the operating system level, performs and controls transports between ABAP based SAP-systems? Note that this program is controlled by your actions, for example in transactions SE09 (Transport Organizer) and STMS (Transport Management System).

- A. transport.exe
- B. RDDIMPDP.bat
- C. import.exe
- D. RDDEXPPP.exe
- E. tp.exe

Correct Answer: E

---

#### QUESTION 5

What catch-phrase best describes SAP's software maintenance strategy?

- A. "3-3-1 maintenance"
- B. "4-2-2 maintenance"
- C. "5-1-2 maintenance"

Correct Answer: C
