QUESTION 1

The following backups have been created for an SQL Server database in the corresponding chronological order (D stands for a full database backup, L for a transaction log backup, and + for a differential backup): D1 L1 L2 +1 L3 L4 +2 L5 L6 D2 L7 L8 +3 L9. After a disk crash, which results in the loss of at least one data file of this database, the database administrator backs up the current transaction log to create the backup L10. Which are the possible sequences for applying some of the backups to restore the database without any loss of data? (Choose two)

- A. D2 L7 L8 L9 L10
- B. D1 +1 L3 L4 L5 L6 L7 L8 L9 L10
- C. D2 +3 L9
- D. D1 +2 L5 L6 +3 L9 L10
- E. D1 +1 L3 L4 +2 L5 L6 L7 L8 L9 L10

Correct Answer: AB

QUESTION 2

Which of the following statements regarding the authorization concept in AS ABAP based SAP systems (for example, SAP ECC) are correct?

- A. Special authorizations are required to define users in SAP systems.
- B. Authorizations are used in SAP systems to control access to data and functions.
- C. Users defined in SAP systems automatically receive authorizations for the database level and the operating system level.
- D. To maintain security in SAP systems, the users SAP* and DDIC should be copied and then deleted.

Correct Answer: AB

QUESTION 3

How many spool work processes can be configured for each SAP instance?

- A. More than one spool work process can be configured for each SAP instance.
- B. The number of spool processes has to be equal to the number of background processes.
- C. Only one spool work process can be configured for each SAP instance.

Correct Answer: A

QUESTION 4

Which steps have to be performed before data can be synchronized between an AS ABAP and a directory server?
(Choose three)

- A. Maintenance of host name, port number and product name of the directory server inside the SAP system
- B. Creation of an RFC destination of type "S" pointing to the directory server
- C. Definition of a system user that is used by the SAP system to log on to the directory server
- D. Creation of an RFC connection of type "T" to the LDAP connector
- E. Creation of an SAP user (type "system") that is used by the directory server to connect to the SAP system

Correct Answer: ACD

QUESTION 5

Which of the following statements regarding the client concept and the client copy tools in ABAP- based SAP Systems (for example, SAP ECC) are true? (Choose three)

- A. Application data can only be copied from one client to another, when all client-specific customizing is also copied.
- B. Clients can be copied between SAP Systems of the same release.
- C. Client-independent customizing is always automatically copied between clients.
- D. User master records cannot be copied between clients.
- E. Clients can be copied within a single SAP System.

Correct Answer: ABE
