QUESTION 1

The new filter can be used in queries as well as in planning. Which of the following statements are correct? (Choose three)

- A. The default values determine the initial filter status of the query.
- B. The default values are ignored when using the filter for data selection in a planning sequence.
- C. '\\Changeable upon execution\\' determines whether the value selection can be changed during query execution.
- D. Filters can be used in queries but they can only be created or changed in the planning modeler.

Correct Answer: ABC

QUESTION 2

Which of the following statements are true of the Report Designer? (Choose three)

- A. No HTML or CSS (Cascading Style Sheet) knowledge is required to create highly formatted reports.
- B. The results created from the Report Designer can be displayed as a web report, printed, or displayed as a PDF.
- C. It is possible to use the results from the Report Designer in the BEx Broadcaster.
- D. The Reports Designer can be used to develop formatted workbooks in the BEx Analyzer.

Correct Answer: ABC

QUESTION 3

Which of the following statements are true regarding sections in the Report Designer? (Choose two)

- A. A static section is based on a data provider that has an underlying query containing two structures.
- B. A dynamic section is based on a data provider that has an underlying query containing one structure.
- C. A dynamic section is based on a data provider that has an underlying query containing two structures.
- D. Dynamic sections offer fewer navigation options than static sections.

Correct Answer: AB

QUESTION 4

Which of the following statements about a DataStore Object can be made with respect to the overall architecture of the BI system? (Choose two)

- A. A DataStore Object can be used to transfer changed data records to other InfoProviders even for non-delta-enabled DataSources.
- B. The DataStore Object is an important component of the DataWarehouse architecture in BI systems. It can serve as both a Target- and a Source-InfoProvider.
- C. Data from the DataStore object can only be updated into InfoCubes.
- D. Queries can be defined based on DataStore Objects of type "Standard" only.

Correct Answer: AB

QUESTION 5
