QUESTION 1

You are executing a process chain to load transaction data from an SAP source system via a standard DSO into an InfoCube but NO DATA arrives in the InfoCube. What are possible reasons for this? (2)

- A. The data does NOT meet the selection criteria of the DTP
- B. The data comprises an error and the error handling setting is set to "Cancel Request, Do Not Track Records, No Update"
- C. The Data Flow object has NOT been activated
- D. The Integrity check is NOT switched on in the transformations

Correct Answer: AB

QUESTION 2

You have created a new Data Flow object in the graphical SAP BW data Flow tool by copying a Data Flow template. What must you do to use the new Data Flow? (1)

- A. Copy non-persistent SAP BW Objects
- B. Validate non-persistent SAP BW Objects
- C. Activate non-persistent SAP BW Objects
- D. Replace non-persistent SAP BW objects with active SAP BW objects

Correct Answer: D

QUESTION 3

A MultiProvider has four InfoCubes as components. One InfoCube is a VirtualProvider and two of the others have aggregates. The total execution time of the MultiProvider query is 29 sec when you expect 10 sec. What can account for this scenario? There are 3 correct answers.

- A. The shadow aggregates are being used because of the roll up job.
- B. The query is running in a batch process.
- C. There are non-cumulative key figures in the InfoCubes.
- D. The query is configured for nonparallel processing.
- E. There are insufficient background processes at execution time.

Correct Answer: CDE

QUESTION 4

Which of the following is a viable alternative to having more than 13 unrelated Characteristics in an InfoCube? Select the correct answer.

- A. Reduce the number of Characteristics down to 13.
- B. Create more than 13 custom-defined Dimensions.
- C. Add the extra ones as Key Figures.
- D. Associate unrelated Characteristics in a single dimension.
- E. Use more than one InfoCube in the design.

Correct Answer: E

QUESTION 5

Partitioning can be used to either aid query response time or manage large amounts of InfoCube data.

Which of the following statements are true about InfoCube partitioning? There are 2 correct answers.

- A. Logical and table partitioning cannot be combined.
- B. The Analytic Engine can do partition pruning.
- C. Table partitions are based either on 0CALMONTH or 0FISCPER.
- D. The Repartitioning toolbox can be used with logical partitioning.

Correct Answer: BCD
