QUESTION 1

You need texts for shipping in a sales order. These are usually sourced from the ship-to party, but if they are not maintained in the ship-to party, they should be sourced from the sold-to party. Which of the following objects controls this behaviour? Choose the correct answer.

A. Condition table

B. Text type

C. Access sequence

D. Text determination procedure

Correct Answer: C

QUESTION 2

A customer usually prefers complete delivery of a sales order. When creating a particular order, however, the customer would like to make an exception and allow partial deliveries. How would you proceed to do this? Choose the correct answer.

A. Deselect the Complete Delivery flag in the sales order itself.

B. Deselect the Complete Delivery flag in the business partner master record.

C. Deselect the Complete Delivery flag in the outbound delivery.

D. Deselect the Complete Delivery flag in the customer-material info record.

Correct Answer: A

QUESTION 3

How do you establish the interface between SAP S/4HANA Sales and Finance? Choose the correct answer.

A. Assign a sales organization to a company code.

B. Uniquely assign a distribution channel to a company code.

C. Set up the upload of the billing document request

D. Set up the general billing interface.

Correct Answer: D

QUESTION 4

Where can you set the condition exclusion indicator? Choose Two correct answers.

A. Condition supplements

B. Condition record

C. Pricing procedure

D. Condition type

Correct Answer: BD

QUESTION 5

When using new output management in SAP S/4HANA, how does the system process a BRF+ decision table to retrieve the required result? Choose the correct answer.

A. Every condition column is processed in sequence. In each condition column, every row is processed from top to bottom. If the condition in each condition column cells met, the field values in the result columns are returned.

B. Every row is processed in sequence. In each row, every condition column cell is processed from left to right. If the condition in each condition column cell is met, the field values in the result columns are returned.

C. Every row is processed in sequence. In each row, every result column cell is processed from leftto right. If the condition in each result column cell is met, the field values in the condition columns are returned.

D. Every row is processed in sequence. In each row, every condition column cell is processed from right to left. If the condition in eachcondition column cell is met, the field values in the result columns are returned.

Correct Answer: B
