QUESTION 1

Which of the following master data can be used with process orders? (Choose three)

- A. Serial numbers
- B. Production versions
- C. Resources
- D. Master recipes
- E. Production/resource tools

Correct Answer: BCD

QUESTION 2

In which master data object do you set the standard values for an operation?

- A. Work Center
- B. Production Resource/Tool (PRT)
- C. Material Master
- D. Routing

Correct Answer: D

QUESTION 3

During a project phase, your customer raises some questions concerning parameters of the procurement type in the material master in the SAP ECC system.

Which of the following procurement type properties are valid? (Choose two)

- A. If procurement type E (in-house production) is set, external procurement may still be possible depending on the material type.
- B. A material's procurement type can be freely selected between E (in-house production), F (external procurement) and X (both procurement types) independent of material type.
- C. Procurement types E (in-house production) and F (external procurement) have to be further refined with special procurement types.
- D. If both procurement types are allowed with entry X (both procurement types), requirements planning assumes in-house production.

Correct Answer: AD

QUESTION 4

Which objects can affect the calculation of capacity requirements for an operation? (Choose three)

- A. Standard values (routing)
- B. Transport time (routing)
- C. Operation control key (routing)
- D. Formulas (work center)
- E. In-house production time (material master)

Correct Answer: ACD

QUESTION 5

For which of the following objects can you enter a confirmation? (Choose two)

- A. Production order
- B. Production order operation
- C. Trigger Point
- D. Work Center

Correct Answer: AB
