## QUESTION 1

What is a technique used in the performance reporting process?

- A. Expert judgment
- B. Project management methodology
- C. Stakeholder analysis
- D. Status review meetings

Correct Answer: D

Performance Reporting is the process for "collecting and distributing performance information" like "status reporting, progress measurement, and forecasting" (comp.PMBOK3, p. 221): On the base of the collected performance information concerning scope, schedule, cost and quality this process generates the reports which are distributed to the stakeholders (comp.PMBOK3, p. 231). Basically one can determine four types of reports:

-Forecast reports for describing future trends -Progress reports for describing trends from past to presence -Status reports for describing actual status -Variance reports for describing differences between the planned baseline and the real data

---

## QUESTION 2

Approved change requests, approved corrective actions, and updates to organizational process assets are all outputs of which project management process?

- A. Risk response planning
- B. Manage stakeholders
- C. Scope definition
- D. Performance reporting

Correct Answer: B

---

## QUESTION 3

You are the project manager for the software Project. This project must be completed within one year. This is an example of which of the following?

- A. Schedule
- B. Assumption
- C. Constraint
- D. Planning process

Correct Answer: C

A project that must be completed by a deadline is dealing with time constraints. A is incorrect since the condition does not offer a schedule. B is incorrect because the condition is not an assumption. D is also incorrect because this is not a planning process.

---

#### QUESTION 4

A Risk Register is a part of the .

- A. Project Scope Statement
- B. Project Management plan
- C. Project Scheduling plan
- D. Project Charter

Correct Answer: B

The Risk Register is detailed part of the project management plan.

---

#### QUESTION 5

During the planning phase of your project, your project team members have discovered another way to complete a portion of the project scope. This method is safer for the project team, but may cost more for the customer. This is an example of .

- A. Alternative identification
- B. Risk assessment
- C. Alternative selection
- D. Product analysis

Correct Answer: A

Alternative identification is a planning process to find alternatives to completing the project scope.
