QUESTION 1

A security manager has received the following email from the Chief Financial Officer (CFO):

"While I am concerned about the security of the proprietary financial data in our ERP application, we have had a lot of turnover in the accounting group and I am having a difficult time meeting our monthly performance targets. As things

currently stand, we do not allow employees to work from home but this is something I am willing to allow so we can get back on track. What should we do first to securely enable this capability for my group?"

Based on the information provided, which of the following would be the MOST appropriate response to the CFO?

A. Remote access to the ERP tool introduces additional security vulnerabilities and should not be allowed.

B. Allow VNC access to corporate desktops from personal computers for the users working from home.

C. Allow terminal services access from personal computers after the CFO provides a list of the users working from home.

D. Work with the executive management team to revise policies before allowing any remote access.

Correct Answer: D

QUESTION 2

The manager of the firewall team is getting complaints from various IT teams that firewall changes are causing issues. Which of the following should the manager recommend to BEST address these issues?

A. Set up a weekly review for relevant teams to discuss upcoming changes likely to have a broad impact.

B. Update the change request form so that requesting teams can provide additional details about the requested changes.

C. Require every new firewall rule go through a secondary firewall administrator for review before pushing the firewall policy.

D. Require the firewall team to verify the change with the requesting team before pushing the updated firewall policy.

Correct Answer: A

QUESTION 3

A small company has a network with 37 workstations, 3 printers, a 48 port switch, an enterprise class router, and a firewall at the boundary to the ISP. The workstations have the latest patches and all have up-to-date anti-virus software. User authentication is a two-factor system with fingerprint scanners and passwords. Sensitive data on each workstation is encrypted. The network is configured to use IPv4 and is a standard Ethernet network. The network also has a captive portal based wireless hot-spot to accommodate visitors. Which of the following is a problem with the security posture of this company?

A. No effective controls in place

B. No transport security controls are implemented

C. Insufficient user authentication controls are implemented

D. IPv6 is not incorporated in the network

Correct Answer: B

QUESTION 4

A software development manager is taking over an existing software development project. The team currently suffers from poor communication due to a long delay between requirements documentation and feature delivery. This gap is resulting in an above average number of security-related bugs making it into production. Which of the following development methodologies is the team MOST likely using now?

A. Agile

B. Waterfall

C. Scrum

D. Spiral

Correct Answer: B

QUESTION 5

Which of the following refers to programs running in an isolated space to run untested code and prevents the code from making permanent changes to the OS kernel and other data on the host machine?

A. Input Validation

B. Application hardening

C. Code signing

D. Application sandboxing

Correct Answer: D
