QUESTION 1

Which features characterize CA Process Automation package objects? (Choose three)

A. They are exported as Java Archive (JAR) files.

B. They can contain multiple versions of the same object.

C. They enable you to define a collection of shortcuts to objects.

D. They can be distributed with unrelated objects between several folders.

E. They are primarily used to define and group variables that are used as parameters by multiple processes.

Correct Answer: BCD

QUESTION 2

You have successfully completed the Web Services Description Language (WSDL) wizard. Now you need to select an input source for the Invoke SOAP Method operator. Which input source is INVALID?

A. WSDL URL

B. In line text

C. Expression

D. Preformatted Simple Object Access Protocol (SOAP) file

Correct Answer: A

QUESTION 3

You need to implement failover-safe CA Process Automation touch points. Which CA Process Automation agent deployment guideline should you follow?

A. Use a single agent deployed on a powerful hardware platform for each touch point.

B. Use a single agent deployed on a powerful hardware platform and map that agent to multiple touchpoints.

C. Use multiple agents deployed on different servers, map these agents to a single touch point, and configure different priorities for the agents.

D. Use multiple agents deployed on the same server, map these agents to a single touchpoint, and configure different priorities for these agents.

Correct Answer: C

QUESTION 4

You use the Monitor Event operator to:

A. Configure a process to wait for an SNMP trap event.

B. Publish an event to an orchestrator before continuing down a path of execution.

C. Configure a process to wait for one or more events published to an orchestrator before continuing down a path of execution.

D. Configure a process to wait for one or more events published to an external application before continuing down a path of execution.

Correct Answer: C

QUESTION 5

If you need to install a CA Process Automation agent on the UNIX platform, which factor should you consider?

A. The domain_url field must contain /itpam/.

B. The agent installer can only be run in interactive mode.

C. The agent installer will install Java as part of the agent install.

D. The domain orchestrator needs to be up and running during the install.

Correct Answer: D
