QUESTION 1

Which statement best describes the options for PaaS encryption?

- A. PaaS is very diverse and may include client/application, database, and proxy encryption as well as other options.
- B. PaaS is strictly limited to client/application, database and proxy encryption.
- C. PaaS is sensitive to application updates and therefore must be constantly refreshed with relevant keys.
- D. PaaS is very diverse and would most likely include file/folder and instance-managed encryption.
- E. PaaS is limited to public networks.

Correct Answer: A

QUESTION 2

To what extent does the CSA Guidance document suffice for legal advice in setting up relationships with cloud service providers?

- A. The CSA Guidance document provides adequate legal advice under certain circumstances.
- B. The CSA Guidance document provides an overview of selected issues and it is not a substitute for obtaining legal advice.
- C. The CSA Guidance document provides copious amounts of relevant case law to enable legal inferences to be developed.
- D. The CSA Guidance document does not discuss any legal issues at all.
- E. The CSA Guidance document provides sufficient guidance to substitute for legal advice.

Correct Answer: D

QUESTION 3

Select the statement below which best describes the relationship between identities and attributes

- A. Attributes belong to entities and identities belong to attributes. Each attribute can have multiple identities but only one entity.
- B. An attribute is a unique object within a database. Each attribute it has a number of identities which help define its parameters.
- C. An identity is a distinct and unique object within a particular namespace. Attributes are properties which belong to an identity. Each identity can have multiple attributes.
- D. Attributes are made unique by their identities.
- E. Identities are the network names given to servers. Attributes are the characteristics of each server.

Correct Answer: D

QUESTION 4

ENISA: Because it is practically impossible to process data in encrypted form, customers should have the following expectation of cloud providers:

- A. Provider should be PCI compliant
- B. Provider should immediately notify customer whenever data is in plaintext form
- C. Provider must be highly trustworthy and have compensating controls to protect customer data when it is in plaintext form
- D. Provider should always manage customer encryption keys with hardware security module (HSM) storage
- E. Homomorphic encryption should be implemented where necessary

Correct Answer: D

QUESTION 5

While a virtual machine is a full abstraction of an operating system, a container is a constrained place to run segregated processes while still using the kernel and other OS capabilities.

- A. True
- B. False

Correct Answer: A
