QUESTION 1

How can you avoid the effects that wet brakes can cause?

- A. Slow down.
- B. Gently put on the brakes. This presses linings against brake drums or discs and keeps mud, silt, sand, and water from getting in.
- C. Place transmission in a low gear.
- D. Increase engine rpm and cross the water while keeping light pressure on the brakes.
- E. When out of the water, maintain light pressure on the brakes for a short distance to heat them up and dry them out.
- F. All of the above

Correct Answer: F

QUESTION 2

What can you do at an accident scene to prevent another accident?

- A. Put on your flashers.
- B. Set out reflective triangles to warn other traffic.
- C. If your vehicle is involved in the accident; try to get it to the side of the road.
- D. If you are stopping to help, park away from the accident.
- E. All of the above.

Correct Answer: E

QUESTION 3

What are two main things to look for ahead while driving?

- A. Road signs and detours.
- B. Fire and Flooding.
- C. Bridges and Tunnels.
- D. Truck Stops and Police.
- E. Traffic and road conditions.

Correct Answer: E

QUESTION 4

What must you check before transporting a sealed load?

- A. The placard numbers match the seal numbers.
- B. That the seal is authentic.
- C. That the seal is secure.
- D. The load is properly secured.

Correct Answer: D

QUESTION 5

The effects of liquid surge are reduced by

- A. Braking far in advance and increasing your stopping distance
- B. Starting, stopping and turning smoothly
- C. Hauling thicker liquids
- D. All of the above

Correct Answer: D

The correct answer is: All of the above. Liquid surge is caused by the movement of liquid in partially filled tanks. Abrupt start, stops or lane changes will increase the effects of liquid surge. Thicker liquids will tend to move less, which will reduce the effects of liquid surge.
