QUESTION 1

A Privacy Program Framework is an implementation roadmap that does all of the following EXCEPT?

- A. Measure a successful security program.
- B. Incorporate data classification and broad privacy checklists.
- C. Provide documented privacy management procedures and processes.
- D. Prompt for details to determine all privacy-relevant decisions for the organization.

Correct Answer: D

QUESTION 2

What is the Privacy Officer's first action after being told that her firm is planning to sell its credit card processing business?

- A. Perform a Record of Processing Activity (ROPA).
- B. Review technical security controls.
- C. Review contractual obligations.
- D. Review data mapping.

Correct Answer: C

QUESTION 3

If done correctly, how can a Data Protection Impact Assessment (DPIA) create a win/win scenario for organizations and individuals?

- A. By quickly identifying potentially problematic data attributes and reducing the risk exposure.
- B. By allowing Data Controllers to solicit feedback from individuals about how they feel about the potential data processing.
- C. By enabling Data Controllers to be proactive in their analysis of processing activities and ensuring compliance with the law.
- D. By better informing about the risks associated with the processing activity and improving the organization's transparency with individuals.

Correct Answer: D

Explanation: A Data Protection Impact Assessment (DPIA) is a process that organizations use to evaluate the potential risks associated with a specific data processing activity, and to identify and implement measures to mitigate those risks. By conducting a DPIA, organizations can proactively identify and address potential privacy concerns before they become a problem, and ensure compliance with data protection laws and regulations. When organizations are transparent about their data processing activities and the risks associated with them, individuals are better informed about how their personal data is being used and can make more informed decisions about whether or not to provide their personal data. This creates a win/win scenario for organizations and individuals, as organizations are able to continue processing personal data in a compliant and transparent manner, while individuals are able to trust that their personal data is being used responsibly. Additionally, by engaging with individuals in the DPIA process and soliciting their feedback, organizations can better understand the potential impact of their data processing activities on individuals and take steps to mitigate any negative impacts.

QUESTION 4

You would like your organization to be independently audited to demonstrate compliance with international privacy standards and to identify gaps for remediation. Which type of audit would help you achieve this objective?

- A. First-party audit.
- B. Second-party audit.
- C. Third-party audit.
- D. Fourth-party audit.

Correct Answer: C

QUESTION 5

Data retention and destruction policies should meet all of the following requirements EXCEPT?

- A. Data destruction triggers and methods should be documented.
- B. Personal information should be retained only for as long as necessary to perform its stated purpose.
- C. Documentation related to audit controls (third-party or internal) should be saved in a non-permanent format by default.
- D. The organization should be documenting and reviewing policies of its other functions to ensure alignment (e.g. HR, business development, finance, etc.).

Correct Answer: C
