QUESTION 1

SCENARIO

Please use the following to answer the next question:

ProStorage is a multinational cloud storage provider headquartered in the Netherlands. Its CEO, Ruth Brown, has developed a two-pronged strategy for growth: 1) expand ProStorage's global customer base and 2) increase ProStorage's sales force by efficiently onboarding effective teams. Enacting this strategy has recently been complicated by Ruth's health condition, which has limited her working hours, as well as her ability to travel to meet potential customers. ProStorage's Human Resources department and Ruth's Chief of Staff now work together to manage her schedule and ensure that she is able to make all her medical appointments. The latter has become especially crucial after Ruth's last trip to India, where she suffered a medical emergency and was hospitalized in New Delhi. Unable to reach Ruth's family, the hospital reached out to ProStorage and was able to connect with her Chief of Staff, who in coordination with Mary, the head of HR, provided information to the doctors based on accommodate on requests Ruth made when she started at ProStorage.

Why is the additional measure recommended by Jackie sufficient for using UpFinance?

- A. UpFinance is an established 7-year-old business.
- B. UpFinance is in a highly regulated financial industry.
- C. UpFinance is based in a country without surveillance laws.
- D. UpFinance implements sufficient data protection measures.

Correct Answer: C

QUESTION 2

SCENARIO

Please use the following to answer the next question:

Anna and Frank both work at Granchester University. Anna is a lawyer responsible for data protection, while Frank is a lecturer in the engineering department. The University maintains a number of types of records:

Student records, including names, student numbers, home addresses, pre-university information, university attendance and performance records, details of special educational needs and financial information. Staff records, including autobiographical materials (such as curricula, professional contact files, student evaluations and other relevant teaching files). Alumni records, including birthplaces, years of birth, dates of matriculation and conferrals of degrees. These records are available to former students after registering through Granchester's Alumni portal. Department for Education records, showing how certain demographic groups (such as first-generation students) could be expected, on average, to progress. These records do not contain names or identification numbers. Under their security policy, the University encrypts all of its personal data records in transit and at rest.

In order to improve his teaching, Frank wants to investigate how his engineering students perform in relation to Department for Education expectations. He has attended one of Anna's data protection training courses and knows that he should use no more personal data than necessary to accomplish his goal. He creates a program that will only export some student data: previous schools attended, grades originally obtained, grades currently obtained and first time university attended. He wants to keep the records at the individual student level. Mindful of Anna's training, Frank runs the student numbers through an algorithm to transform them into different reference numbers. He uses the same

algorithm on each occasion so that he can update each record over time.

One of Anna's tasks is to complete the record of processing activities, as required by the GDPR. After receiving her email reminder, as required by the GDPR. After receiving her email reminder, Frank informs Anna about his performance database.

Ann explains to Frank that, as well as minimizing personal data, the University has to check that this new use of existing data is permissible. She also suspects that, under the GDPR, a risk analysis may have to be carried out before the data processing can take place. Anna arranges to discuss this further with Frank after she has done some additional research.

Frank wants to be able to work on his analysis in his spare time, so he transfers it to his home laptop (which is not encrypted). Unfortunately, when Frank takes the laptop into the University he loses it on the train. Frank has to see Anna that day to discuss compatible processing. He knows that he needs to report security incidents, so he decides to tell Anna about his lost laptop at the same time.

Which of the University's records does Anna NOT have to include in her record of processing activities?

- A. Student records
- B. Staff and alumni records
- C. Frank's performance database
- D. Department for Education records

Correct Answer: C

QUESTION 3

The European Data Protection Board (EDPB) recommends measures to supplement transfer tools, in order to ensure compliance with the European Union (EU) level of personal data protection. According to these recommendations, what additional actions should be taken when a transfer to a third country is based upon an adequacy decision?

- A. Adopt a supplementary data transfer mechanism.
- B. Monitor the ongoing validity of the data transfer mechanism.
- C. Adopt technical, contractual or organizational supplementary measures.
- D. Monitor changes in the law or practice of the third country that would tower the level of protection of personal data

Correct Answer: D

QUESTION 4

Under the GDPR, which of the following is true in regard to adequacy decisions involving cross-border transfers?

- A. The European Commission can adopt an adequacy decision for individual companies.
- B. The European Commission can adopt, repeal or amend an existing adequacy decision.

- C. EU member states are vested with the power to accept or reject a European Commission adequacy decision.
- D. To be considered as adequate, third countries must implement the EU General Data Protection Regulation into their national legislation.

Correct Answer: A

QUESTION 5

What is a reason the European Court of Justice declared the Data Retention Directive invalid in 2014?

- A. The requirements affected individuals without exception.
- B. The requirements were financially burdensome to EU businesses.
- C. The requirements specified that data must be held within the EU.
- D. The requirements had limitations on how national authorities could use data.

Correct Answer: D
