## QUESTION 1

To ensure appropriate control of information processed in IT systems, security safeguards should be based PRIMARILY on:

- A. established guidelines
- B. criteria consistent with classification levels
- C. efficient technical processing considerations
- D. overall IT capacity and operational constraints

Correct Answer: A

---

## QUESTION 2

Which of the following is the MOST effective way to help ensure web developers understand the growing severity of web application security risks?

- A. Standardize secure web development practices
- B. Integrate security into the early phases of the development life cycle
- C. Incorporate security requirements into job descriptions
- D. Implement a tailored security awareness training program

Correct Answer: D

---

## QUESTION 3

Which of the following is the MOST important information to include in a strategic plan for information security?

- A. Information security staffing requirements
- B. Current state and desired future state
- C. IT capital investment requirements
- D. information security mission statement

Correct Answer: B

It is most important to paint a vision for the future and then draw a road map from the stalling point to the desired future state. Staffing, capital investment and the mission all stem from this foundation.

---

## QUESTION 4
