QUESTION 1

In Report Studio, an author is using a relationally modeled package and wants to filter a report to only include three specific products. If the author is not sure how to spell the product names, what is the fastest way to add the product names to the filter expression?

- A. Use a value prompt to have users select the product names.
- B. Use the Select Multiple Values feature to search for the product names.
- C. Add the product names from the Source tab in the Available components pane.
- D. Add the product names from the Data Items tab in the Available components pane.

Correct Answer: B

QUESTION 2

In Report Studio, an author wants the report title to appear in the language in which the report is run. What property of the report header must the author define to create this variable?

- A. Style Variable
- B. String Variable
- C. Render Variable
- D. Text Source Variable

Correct Answer: D

QUESTION 3

In Report Studio, an author wants to use a join object to create a relationship between two queries. Which of the following is true?

- A. The author can use a join object to create either an inner or outer join between the queries.
- B. The author can use a join object only if both queries contain data from OLAP data sources.
- C. The author can use a join object only if both queries contain data from relational sources that has not been modeled dimensionally.
- D. Both queries must contain the same number of data items, the data items must be compatible and must appear in the same order.

Correct Answer: A

QUESTION 4

In Report Studio, what is a baseline?

- A. A value in a list report that other values are compared against.
- B. A constant value that represents the x-axis in a chart.
- C. A constant value drawn on a chart to indicate major divisions in the data.
- D. A break point that keeps part of a report stationary while the user scrolls.

Correct Answer: C

QUESTION 5

In the report shown,

users click on the Product line link to navigate to the specific product line in the list below. Users can also click on the Top link to return to the Product line list at the top of the report. Bookmarks are used to control this drill-through behavior. How is each of the drill-throughs defined for this report to function as described?

- A. Product line drill-through: bookmark source type = Text, where Text =Top;Top drill-through: bookmark source type = Data Item Value, where Data Item = Product line
- B. Product line drill-through: bookmark source type = Data Item Label, where Data Item = Product line;Top drill-through: bookmark source type = Text, where Text =Top
- C. Product line drill-through: bookmark source type = Data Item Value, where Data Item = Product line;Top drill-through: bookmark source type = Text, where Text =Top
- D. Product line drill-through: bookmark source type = Text, where Text = Top;Top drill-through: bookmark source type = Data Item Value, where Data Item = Product line

Correct Answer: C
