A. Drill-through values must be cast.

B. Drill-through values must be conformed.

C. Drill-through values must be consolidated.

D. Drill-through values must be identifiers.

Correct Answer: B

QUESTION 2

Which of the following are proven practices for organizing the objects in a project?

A. When importing metadata from more than one data source, include all imported objects in the root namespace.

B. When importing metadata from more than one data source, create a separate folder for the imported objects from each data source.

C. When importing metadata from more than one data source, create a separate namespace for the imported objects from each data source.

D. When importing metadata from more than one data source, do not override the relationships defined between the data sources at the time of import.

Correct Answer: C

QUESTION 3

A recursive relationship exists between SALES_STAFF_CODE and MANAGER_CODE in the SALES_STAFF data source query subject. This query subject is provided in a model to report authors. Using this query subject alone, report authors cannot create a report that includes management staff and the sales staff that report to them.

How can the existing recursive relationship in the model be modified to provide this ability to report authors?

A. Import a query subject that does not contain a recursive relationship.

B. Create a star schema grouping that contains the SALES_STAFF data source query subject and a shortcut to the SALES_STAFF data source query subject.

C. Create a model query subject with the appropriate relationship to the existing SALES_STAFF data source query subject and make both available to report authors.

D. Create a shortcut to the SALES_STAFF data source query subject, and report authors will use it instead of the underlying query subject to create the required report.

Correct Answer: C
