## QUESTION 1

Which statement is NOT a characteristic of Spring's PlatformTransactionManager base interface (select one)

- A. When declaring a PlatformTransactionManager implementation inside Spring configuration: as a requirement, the bean id should be "transactionManager"
- B. The PlatformTransactionManager interface abstracts the differences between local and JTA transactions
- C. There are various implementations of JTA transaction managers for different Java EE containers
- D. PlatformTransactionManager is used in both declarative and programmatic transaction management

Correct Answer: A

---

## QUESTION 2

Which of the following data access technologies does Spring support? (Select one)

- A. JDBC
- B. JPA
- C. JBoss Hibernate
- D. All of the above

Correct Answer: D

---

## QUESTION 3

What is the primary purpose of bean definition inheritance? (Select one or several answers)

- A. To configure Java class inheritance dynamically within the XML bean definition file
- B. To reduce the amount of configuration required by inheriting properties from other bean definitions
- C. To allow Spring beans to be created on the fly from classes declared as abstract
- D. To simplify configuration by allowing multiple properties files to be loaded in a hierarchy to specify bean properties

Correct Answer: B

---

## QUESTION 4

Assuming a web application context name of "rewardsonline", a servlet mapping of "/admin/\*", and an incoming URL of "/rewardsonline/admin/accounts/show", what is the URL used for Spring MVC request-mapping purposes? (select one)

- A. /rewardsonline/admin/accounts/show

B. /admin/acounts/show

C. /accounts/show

D. /show

Correct Answer: C

---

## QUESTION 5
