QUESTION 1

Basically an operational definition is a description in quantifiable terms, of what to measure and the specific steps needed to measure it constantly.

A good operational definition: (Choose two.)

- A. Gives communicable meaning to a concept or an idea
- B. Is no doubt clear but somewhat ambiguous
- C. Is a decision-making criteria
- D. Enables consistently in data collection

Correct Answer: AD

QUESTION 2

The increased focus on and mandate for healthcare data place healthcare providers in a different situation than they have known in the past. Providers document such things and, unfortunately, many providers struggle to address the measurement mandate proactively, which leads organizations to assume a defensive posture when external organizations release the data.

Which of the following ways show/s the responses of provider in such cases? (Choose three.)

- A. The data are old (typically one or two years) and do not reflect our current performance
- B. The data are not stratified and do not represent appropriate comparisons.
- C. Our patients are similar those at the other hospitals in our comparison group (i.e., no risk adjustments were made to the data).
- D. We can move in a better way without doing competition with others

Correct Answer: ABC

QUESTION 3

All of the following are characteristics of probability sampling EXCEPT:

- A. A specific statistical design is followed
- B. The selection of items from the population is determined solely according to known probabilities by means of a random mechanism, usually using a table of random digits
- C. The sampling error (i.e., the difference between results obtained from a sampling survey and results that would have been obtained from a census of the entire population conducted using the same procedure as in sampling survey) can be estimated, and, as a result, the precision of the sample result can be evaluated.
- D. Listing of selected sample on a priority basis on a sampling sheet

Correct Answer: D

QUESTION 4

Which of the following types of budgets itemizes the major equipment to be purchased in the next year?

- A. Capital
- B. Variable
- C. Operating
- D. Zero-based

Correct Answer: A

QUESTION 5

For checking the outcomes our focus of attention is blood pressure of patients with diabetes. Its criteria and standard can be respectively:

- A. Criterion: Percentage of post heart attack patients prescribed beta-blockers on discharge and Standard: At least 96% of heart attack patients receive a beta-blocker prescription on discharge
- B. Criterion: Percentage of patients with diabetes whose blood pressure is at or below 130/85 and Standard: At least 50% of patients with diabetes have blood pressure at or below 130/85
- C. Criterion: Sugar level in blood on daily basis and Standard: How many times sugar level rises and how many times it declines in a week
- D. None of these

Correct Answer: B
