QUESTION 1

A vulnerability scanner generates the following output: The company has an SLA for patching that requires time frames to be met for high-risk vulnerabilities. Which of the following should the analyst prioritize first for remediation?

IP address	Name
10.12.2.40	SSL Certificate Cannot Be Trusted
10.16.2.52	Redis Server Unprotected by Password Authentication
10.100.26.60	Cisco Webex Meetings Scheduled Meeting Template Deletion
10.14.0.15	SMB Signing not required
10.12.2.40	SSL Self-Signed Certificate
172.27.2.153	Sysinternals PsExec Elevation of Privilege (CVE-2021-1733)
172.27.2.153	Oracle Java JDK / JRE 6 < Update 30 Multiple Vulnerabilities

Vulnerability state	CVSS	Age
New	6.4	13 days
Active	7.5	43 days
Resurfaced	6	701 days
Active	5	25 days
New	6.4	13 days
Resurfaced	4.6	435 days
Resurfaced	10	4 days

- A. Oracle JDK
- B. Cisco Webex
- C. Redis Server
- D. SSL Self-signed Certificate

Correct Answer: A

QUESTION 2

A security analyst recently joined the team and is trying to determine which scripting language is being used in a production script to determine if it is malicious. Given the following script:

```
foreach ($user in Get-Content .\this.txt)
{
    Get-ADUser $user -Properties primaryGroupID |select-object pr:
    Add-ADGroupMember "Domain Users" -Members $user
    Set-ADUser $user -Replace 0(primaryGroupID=513)
}
```

Which of the following scripting languages was used in the script?

- A. PowerShell
- B. Ruby
- C. Python
- D. Shell script

Correct Answer: A

The script uses PowerShell syntax, such as cmdlets, parameters, variables, and comments. PowerShell is a scripting language that can be used to automate tasks and manage systems.

QUESTION 3

A manufacturing company has joined the information sharing and analysis center for its sector. As a benefit, the company will receive structured IoC data contributed by other members. Which of the following best describes the utility of this data?

- A. Other members will have visibility into instances of positive IoC identification within the manufacturing company's corporate network.
- B. The manufacturing company will have access to relevant malware samples from all other manufacturing sector members.
- C. Other members will automatically adjust their security postures to defend the manufacturing company's processes.
- D. The manufacturing company can ingest the data and use tools to autogenerate security configurations for all of its infrastructure.

Correct Answer: B

QUESTION 4

A company's security team is updating a section of the reporting policy that pertains to inappropriate use of resources (e.g., an employee who installs cryptominers on workstations in the office). Besides the security team, which of the following groups should the issue be escalated to first in order to comply with industry best practices?

- A. Help desk
- B. Law enforcement
- C. Legal department
- D. Board member

Correct Answer: C

When updating a reporting policy that pertains to inappropriate use of resources, it's important to involve the legal department as one of the first steps. Inappropriate use of resources can have legal implications, and involving the legal department ensures that the policy aligns with legal regulations and requirements. They can provide guidance on the appropriate actions to take and help ensure that the policy is comprehensive and legally sound.

QUESTION 5

A development team recently released a new version of a public-facing website for testing prior to production. The development team is soliciting the help of various teams to validate the functionality of the website due to its high visibility. Which of the following activities best describes the process the development team is initiating?

- A. Static analysis
- B. Stress testing
- C. Code review
- D. User acceptance testing

Correct Answer: D
