QUESTION 1

What phrase defines Equivalent Isotropically Radiated Power (EIRP)?

- A. The power output from the radio into the RF cable
- B. The power output from the radio after cable losses
- C. The highest RF signal strength that is transmitted from a given antenna
- D. Power supplied from the transmission line to the antenna input

Correct Answer: C

QUESTION 2

You are being interviewed by ABC Company for employment as a wireless site survey expert. The interviewing manager asks you what items should be included in a site survey report generated as part of a manual site survey process.

What answer would be accurate?

- A. Itemized list of equipment, licenses, and support contracts required for the facility
- B. RF heat map illustrating coverage and signal quality for each frequency band
- C. Documentation proving proper entry of wall material types into the site survey software
- D. Documentation noting how each WLAN user group will authenticate to the network

Correct Answer: B

QUESTION 3

In an 802.11 2.4 GHz system, what 22 MHz channels are considered non-overlapping? (Choose 2)

- A. Channels 5 and 10
- B. Channels 1 and 5
- C. Channels 3 and 7
- D. Channels 2 and 8
- E. Channels 8 and 11
- F. Channels 10 and 13

Correct Answer: AD

QUESTION 4

What advantages does using predictive site survey modeling software offer over performing a manual site survey? (Choose 2)

- A. Predictive modeling software can predict the ideal access point location 100% of the time, whereas the results from manual surveying are less reliable.
- B. Predictive modeling software makes it simple to assess multiple different AP locations and then adjust and display the AP's expected coverage pattern in almost real-time.
- C. Predictive modeling software provides more reliable data than manual surveys when fine-tuning and validating access point placement after the installation.
- D. The exact impact of interference sources from external networks can be more accurately measured when using predictive modeling software than with manual surveys.
- E. It takes less time to create an initial site survey for a large facility when using predictive modeling software than when performing a manual survey.

Correct Answer: BE

QUESTION 5

The 802.11 protocol specifies a fundamental channel access method that is required for all stations and is available for use in all IBSS and BSS networks.

What is this fundamental channel access method called?

- A. DCF
- B. PCF
- C. HCF
- D. EDCAF

Correct Answer: A
