QUESTION 4

Universal Containers (UC) is in the process of selling half of its company. As part of this split, UC's main Salesforce org will be divided into two orgs: org A and org B, UC has delivered these requirements to its data architect

1.

The data model for Org B will drastically change with different objects, fields, and picklist values.

2.

Three million records will need to be migrated from org A to org B for compliance reasons.

3.

The migrate will need occur within the next two month, prior to be split.

Which migrate strategy should a data architect use to successfully migrate the data?

- A. use as ETL tool to orchestrate the migration.
- B. Use Data Loader for export and Data Import Wizard for import
- C. Write a script to use the Bulk API
- D. Use the Salesforces CLI to query, export, and import

Correct Answer: C

QUESTION 5

Universal Containers (UC) is concerned that data is being corrupted daily either through negligence or maliciousness. They want to implement a backup strategy to help recover any corrupted data or data mistakenly changed or even deleted.

What should the data architect consider when designing a field -level audit and recovery plan?

- A. Reduce data storage by purging old data.
- B. Implement an AppExchange package.
- C. Review projected data storage needs.
- D. Schedule a weekly export file.

Correct Answer: A
