

## DEA-1TT4<sup>Q&As</sup>

Information Storage and Management v4 exam

### Pass Dell DEA-1TT4 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.leads4pass.com/dea-1tt4.html>

100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Dell Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

## QUESTION 1

Which technology uses the concept that real-life objects can independently share and process information with minimal human interaction?

- A. Deep Learning
- B. Cloud computing
- C. Internet of Things
- D. Artificial Intelligence

Correct Answer: C

Reference: <https://www.i-scoop.eu/internet-of-things-guide/>

---

## QUESTION 2

Which layer contains services that define network behavior through policies and resource requirements in a software-defined networking architecture?

- A. Interface
- B. Control
- C. Application
- D. Infrastructure

Correct Answer: D

Reference: <https://www.sdxcentral.com/networking/sdn/definitions/what-the-definition-of-software-defined-networking-sdn/>

---

## QUESTION 3

Which Dell EMC product is a software-defined storage platform that abstracts, pools, and automates a data center's physical storage infrastructure?

- A. XtremIO
- B. ViPR Controller
- C. VxFlex OS
- D. PowerMax

Correct Answer: B

---

## QUESTION 4

DRAG DROP

Match the software-defined storage (SDS) attributes with their respective description.

Select and Place:

| <b>SDS Attributes</b>          | <b>Description</b>  |
|--------------------------------|---|
| Unified management             | Single large storage pool spanning across the underlying storage infrastructure |
| Storage abstraction            | Dynamic composition of storage services based on application policies           |
| Open and extensible            | Single control point for the entire infrastructure                              |
| Automated storage provisioning | Integration of external interfaces and application through the use of APIs      |

Correct Answer:

| <b>SDS Attributes</b> | <b>Description</b>             |
|-----------------------|--------------------------------|
|                       | Storage abstraction            |
|                       | Automated storage provisioning |
|                       | Unified management             |
|                       | Open and extensible            |

## QUESTION 5

A company is planning to perform a cloud-based backup. They want to send their data over a public network to a cloud backup device. Which security control mechanism helps to protect the data from an attacker?

- A. Multi-factor authentication
- B. Demilitarized zone
- C. Data shredding
- D. Encryption

Correct Answer: D
