QUESTION 4

What creates a large-scale SAN without storage systems and uses local storage of existing compute systems?

- A. Compute-based SAN
- B. Software-defined compute
- C. Storage-based SAN
- D. Software-defined network

Correct Answer: A

QUESTION 5

Which state change notifications (SCNs) are issued by an iSNS server to the registered devices?

- A. CPU events
- B. Output events
- C. Input events
- D. Network events

Correct Answer: D

The State Change Notification (SCN) service allows the iSNS Server to issue notifications about network events that affect the operational state of Storage Nodes. The iSNS client may register for notifications on behalf of its Storage Nodes for notification of events detected by the iSNS Server.
